10 Tambrey Way, Malaga, 6090

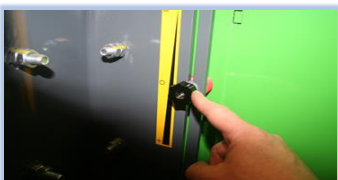

True 50-tonne pressing force and long-stroke cylinder for maximum compaction rate of 400–500 kg per cubic metre.

Automatic and manual cycle option can be set for cardboard or higher memory material like plastic.

Unique configuration of floating and fixed retention fingers helps optimise baling of plastic & soft waste with built in memory.

Ideal bale size for pallets, with easily adjustable bale height to maximise containerised weight or maximise transport space.

Simplified low-voltage user controls, integrated powered bale out unit, easy-tie system and heavy-duty door clamp for easy and safe operation

External waterproof power pack for easy service and maintenance
