

Infra-Red Thermometer with Probe

Model: AZ8838

Infra-red Thermometer with fold-out Probe

This Infra-red thermometer gun is heavy duty and includes HACCP lights for trainees. It has an infra-red and fold-out probe thermometer in one. When the HACCP lights show a green LED the temperature being read is within food range temps and show a red LED if the temperature being read is outside the safe food temperature zone. Meets and exceeds Australian Food Safety standards. Also includes a timer function. The unit has a waterproof moulded design giving it strength and long life. This makes it perfect for use in food areas, transport, cafe's restaurants, hospitals, nursing homes, etc.
