

ECC Hydraulic Concrete Cracker

The *Embrey* ECC Hydraulic Concrete Cracker is designed to cut through heavily reinforced concrete structures. It has replaceable teeth and 4 way indexable cutting blades. The large jaw opening and narrow teeth concentrates the power to enable processing of larger concrete than traditional pulverisers. Rotary is standard but also available as a non rotary.

Specifications

Model	Excavator Weight	Attachment weight	Jaw opening	Force at tip	Force at blade	Blade length
ECC5R	3-5t	280kg	320mm	23t	104t	100mm
ECC8R	6-9t	600kg	460mm	45t	210t	170mm
ECC10R	10-14t	1050kg	575mm	65t	300t	200mm
ECC12R	12-20t	1300kg	620mm	65t	330t	200mm
ECC20R	20-29t	2100kg	970mm	73t	440t	250mm
ECC30R	30-40t	2900kg	1120mm	87t	540t	300mm
ECC40R	40-50t	3750kg	1350mm	105t	630t	300mm
ECC50R	50t>	4760kg	1520mm	120t	750t	350mm
