

PROVEN TO KILL SURFACE AND AIRBORNE BACTERIA AND VIRUSES

Ultraviolet Light and Ozone Sterilisation

STERILISE A ROOM IN UNDER 5 MINUTES

ELIMINATES:

✓ Covid-19 ✓ Odours ✓ Insects ✓ Bacteria ✓ Viruses

intertek

Internationally certified by Intertek
Intertek is a multinational assurance, inspection, product testing and certification company.

Non-toxic, Chemical Free Sterilisation

Completely Verifiable

Eliminate Contaminates in Under 5 Minutes

Internationally Certified

Are you sick of using harmful chemicals?

NON-TOXIC ~ CHEMICAL FREE ~ POWERFUL TECHNOLOGY

PROVEN TECHNOLOGY

Sterile-Bright lighting technology, developed by Ultra-Tech™ is **proven to neutralize bacteria, viruses, fungi and spores**

COMPLETELY VERIFIABLE

This technology is verified by a dosimeter card. The card contains ink that changes colour when the levels of sanitization occur.

LONG LASTING

Unlike the majority of other UV-C technologies on the market, **included parts last up to ten years.**

SAFE AND NON-TOXIC

The portable Sterile-Bright system comes with **remote control** – so you do not have to be in the room to turn on the unit.

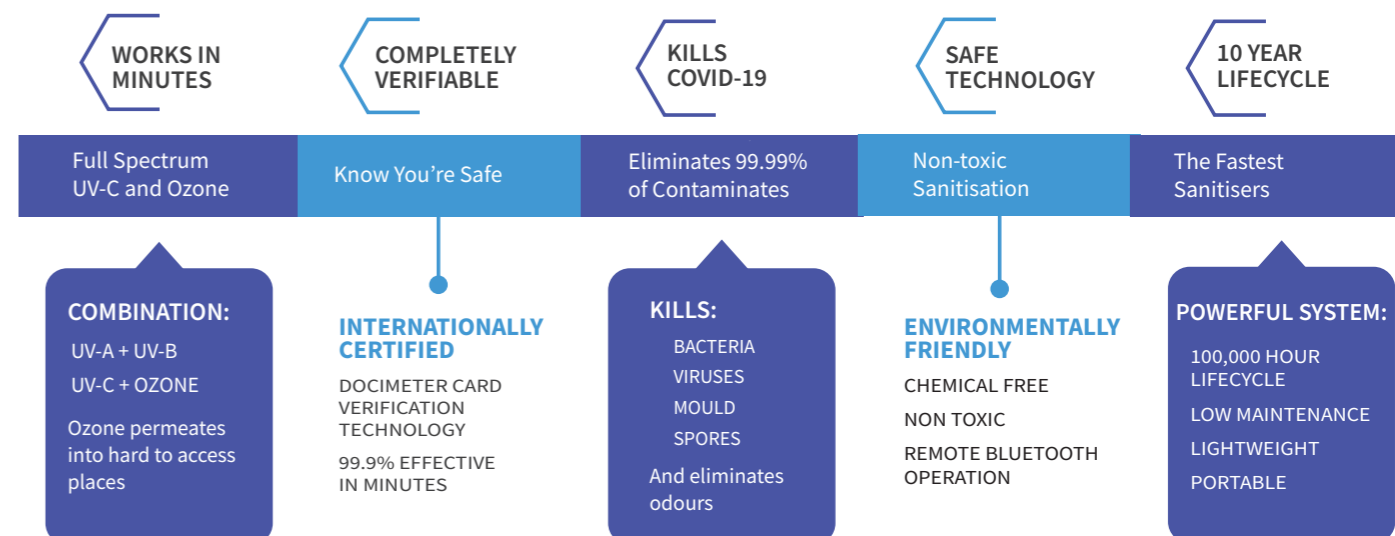

Using UV-C and ozone Sterile-Bright™ works by destroying the DNA and RNA of microorganisms and is therefore effective against all types of viruses including Flu's, Colds, Corona Virus/SARS, Measles and German Measles etc

Are you sick of COVID-19?

The COVID-19 crisis calls for fast, cost-effective, and proven solutions. Efficacy of the UV/Ozone approach is known science, requiring no further extensive testing or trials. The technology can be confidently and effectively deployed immediately.

What does Sterile-Bright do?

Many world-class organisations such as WHO, EPA, CDC, ASHRAE have been recommending the use of UV-C for sanitising and disinfecting water, environments and air conditioning systems for decades.

WHAT OUR CLIENTS SAY

Industry Leaders Already Using This Technology

Tolstoy Foundation - Rehabilitation and Nursing Centre

"We were searching for an alternative to chemical treatments. We purchased a Sterile-Bright™ sterilization lamp and could not be more satisfied with the results.

This amount of UV is sufficient to deactivate Coronaviruses like Covid-19 and Rhinoviruses. The added advantage of deodorizing ozone odour control is extremely important for our nursing home." - *Frank Malloy, Director of Facilities & Environmental Services*

Southampton Inn

"We purchased one hand-portable model during the difficult COVID-19 period. Housekeeping was relieved to be able to use the light for just 5 minutes.

Sterile-Bright worked so well for our company that we purchased a second unit. An excellent product that we are happy to provide references/ testimonial for." - *Dede Moan, CEO*

THE BENEFITS

- **NO MORE ODOURS**
UV-C and Ozone used together completely eliminates odours in minutes!
- **REDUCED WAGE COSTS**
No more time used up by extensive cleaning
- **FASTER TURNAROUND**
Get residents and guests into their new rooms much faster
- **NO MORE HARMFUL AND SMELLY CHEMICALS**
Sterile-Bright is completely non-toxic and chemical free

Over 30 years specialising in energy-efficient indoor environment solutions
