

## OVIVO ECO-MAT™ TECHNOLOGY

### Improved Thickening

- Thickening of WAS without using polymer
- Reduced chemicals and disposal cost

### Reduced Footprint

- Smaller tanks, no chemical storage – less concrete

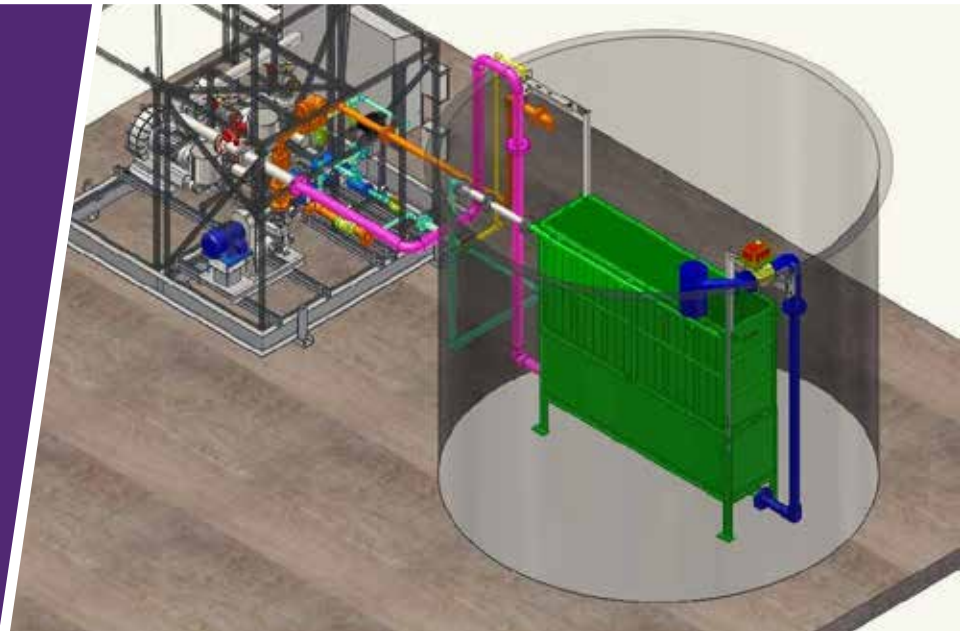

### Reduced Operator Attendance

- No set-up or clean up time

### Produces High Quality Permeate

#### When Used with an Aerated Digester

- Permeate can be combined with effluent without reducing quality
- Sludge for disposal has reduced Total N

## FEATURES

THE OVIVO ECO-MAT™ TECHNOLOGY IS A COMPLETELY PRE-ENGINEERED MEMBRANE THICKENER THAT IS COMPETITIVE IN THE CONVENTIONAL WWTP THICKENING MARKET.

### Benefits of Pre-Engineered Design

- Documentation
- Complete Scope
- Reduced Engineering Costs
- Reduced Construction Costs
- Shorten Project Schedule
- Overall Best Value to Owner

### Standard Items

- Process Control Methods
- PLC Panel & HMI
- Instrumentation
- Equipment
- Layout
- Equipment Skid
- Tank

### Options

- Sludge Holding Aeration Basin
- Steel or Concrete Tank
