

# Ergonomic movement of heavy loads. Linea combined

## ADVANTAGES

- **Ergonomic foot pedal:**  
"Kick-Pedal" for quick and easy operation with any kind of footwear.
- **Optimised steering mechanism:**  
Directional lock for improved steering around bends, as well as moving in a straight line for long distances.
- **Optimised manoeuvrability:**  
Twin wheel castor with high manoeuvrability due to differential effect.

---

## TECHNOLOGY

- **Intelligent locking system:**  
Integrated total and directional lock.
- **Robust housing:**  
Twin wheel castor for high load capacity and low height.
- **Certified safety:**  
TÜV Süd certified performance standard for hospital bed castors.

IN USE

BETTER MOBILITY. BETTER LIFE.

A higher degree of digitization and more mobility go hand in hand with us.

The user becomes more flexible and increases his own productivity through the optimized mobility.
