# TRIO MAX

A game changer

This revolutionary applicator boasts a 4cm spot size with a new high fluence mode for faster treatments and fewer sessions compared to older laser devices. The 3 laser wavelength combination targets follicles at different depths for effective hair reduction. With Alma's patented SHR technology, treatments are virtually pain free and safe for all skin tones, including tanned skin.

**755 nm**  
wavelength

**810 nm**  
wavelength

**1064 nm**  
wavelength

Targets hair follicles at all depths, MAXimising results.

## It's Time to Boost Your Business

This game-changing platform enables you to treat your patients in shorter sessions, leaving them delighted with the results, while giving your practice a competitive edge.

### Profit Potential

A shorter treatment time means you can treat more patients, speeding up your ROI.

### Growing Demand

The rising consumer desire for maintaining physical appearance means the laser hair removal market is growing at a rapid rate. Don't get left behind.

### Foot Traffic

Laser hair removal is a great way to get new patients through your door, giving you the opportunity to up-sell other treatments and products to a market that was previously unavailable to you.

\*Valid in SHR In-Motion mode and high fluence levels.
