SMART IMAGING

TUNE IN TO MUSICA

INTELLIGENT IMAGE PROCESSING

MUSICA delivers consistently high image quality across species, views and users. All of this is achieved independent of tuning files and window level adjustment.

- Balanced presentation of soft tissue and overlapping bone structures
- Realistic representation of anatomy, not over processed
- Confident comfortable reading
- Gold standard in human and veterinary radiology
- A truly innovative “hands free” medical image processor

SMART WORKFLOW

SOUND SMART DR™ refines the imaging experience with seamless integration from capture to cloud to review.

SMART Flow

The easiest, most intuitive imaging experience ever created specifically for veterinary use with speed, efficiency and accuracy in mind.

SMART User

Placing advanced features at the fingertips, enabling novice to expert to get more out of radiography than ever before.

SMART Sync

Delivering effortless image routing from acquisition to review to sharing to storage.
