

SDI Select™ 60

The Power of Selection

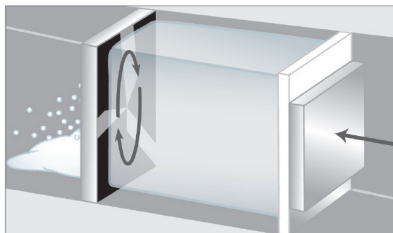

VERSATILITY ON DEMAND

Dry ice cleaning continues to become the preferred method for environmental cleaning and surface preparation across an increasing number of industries. Cold Jet remains ahead of the curve with the SDI Select™ 60, a dry ice cleaning system that offers the value of delicate cleaning and high-level aggression all in one frame.

Designed with application variability and ever-changing industry demands in mind, the SDI Select 60 can navigate the dry ice cleaning spectrum with ease.

Showcasing Cold Jet's patented shaved ice technology, the SDI Select 60 can clean large surfaces of thin, hard contaminant, without damaging the substrate. And when faced with heavier contaminants, simply bypass the shaving media, turn up the aggression and clean using full 3mm pellets.

THE POWER OF SELECTION

Cold Jet's patented feeder technology creates shaved dry ice on demand, regardless of input.

Simply switch to full pellet cleaning to penetrate the most difficult, thick contaminants.

KEY BENEFITS

- Shave with any dry ice media
standard block, 3mm pellet, nugget, slice, even leftover scrap ice
- Bypass for full 3mm pellet performance
- Clean from as low as 50 CFM, using 1/3 of the compressed air, thus reducing noise levels and air usage vs. alternative dry ice cleaning systems
- Increase blast pressure up to 250 PSI to clean the most stubborn contaminants
- Choose from any Aero nozzle or accessory to maximize flexibility

DIMENSIONS	WEIGHT	FEED RATE	BLAST PRESSURE RANGE	HOPPER CAPACITY
24 x 28 x 43 in	343 lbs	0 - 6 lbs / min	*20 - 250 PSI	60 lbs (10 x 12 x 12 in)
61 x 71x 109 cm	156 kg	0 - 2.7 kg / min	*3.4 bar - 17.2 bar	27.2 kg (250 x 300 x 300 mm)

*minimum supply 65 PSI/4.5 bar

SDI Select™ 60

The Power of Selection

ANY ICE. ANY APPLICATION. ANYWHERE.

Cold Jet's SDI Select™ 60 is designed to be the most simplistic, user-friendly dry ice cleaning system available today. With the ability to shave any dry ice media input through patented feeder technology, the SDI Select 60 opens new cleaning opportunities for users who experience limited dry ice availability. Now, they can source any form of dry ice for their cleaning medium.

BLOCK

PELLETS & NUGGETS

SLICE

NEVER LEFT OUT IN THE COLD

Total dry ice flexibility allows end-users to break through application limitations based on required or available media. With the SDI Select 60, managing the dry ice supply chain becomes hassle free and provides the freedom to utilize the lowest cost media from any local provider, saving both time and money. Moving beyond standard forms of media (including pellets, block, nuggets and slices) the SDI Select 60 also accepts leftover ice – which includes the rejected, broken or aged block, as well as spare pieces of dry ice that have been sitting around for a week. For value-conscious end users, the ability to clean using leftover ice can greatly improve the ROI of each application.

When timing is of the utmost importance, the SDI Select 60 can accept retail slices. It's as simple as a trip to the local retailer to solve your immediate dry ice cleaning needs.
