

AR-V Series

Vertical Air Receiver Tanks

500-2000L
Volume

160 + psi
Max Pressure Range

DESCRIPTION

Vertical Air Receiver Tanks are designed to store compressed air. Volume depends on the compressor's capacity and the amount of air consumed.

The supply of pressure vessels includes:

- Anti-corrosion protection with basic colour painting and final painting
- AS1210 Certified
- Supporting Legs

Applications

- Compressed Air Systems
