ASC P7

QUALITY WITHOUT COMPROMISE

The ASC P7 is an industrial grade machine designed for a variety of harsh applications.

Due to its compact design, the ASC P7 is designed to be manoeuvrable in tight spaces.

The ASC P7 is fitted with an M Class, baghouse dust filtration system. This system is designed for extreme dust and requires little maintenance and ensures the best dust control available in the market.

With its powerful Kubota motor, the P7 reaches a top speed of 12 km/h, with a working speed of 8 km/h making it suitable for sites with high vehicle traffic.

SIMPLE OPERATION

Featuring mechanical levers and switches, the machine is easy to operate and can be understood in seconds.

POWERFUL KUBOTA ENGINE

Ran by a powerful Diesel, 14.9kW(20HP) Kubota engine, the machine delivers excellent sweeping, filtration and climbing capacity performance.

EASY MAINTENANCE

The P7 main and side brooms can be removed and replaced in minutes with minimal background knowledge.

FEATURES

- Simple and intuitive to use
- Extremely accessible for maintenance
- Heavy-duty solid tyres
- Fully mechanical, easy to repair
- Water-misting system for dust mitigation
- Fitted side mirrors
- Powerful bag-house filtration system
- Dumping height up to 1.510m
- High climbing capacity
- Hydrostatic rear-drive motor
- Heavy-duty overhead guard
- Seat belt, driving lights and reverse beeper.

ACCESSIBLE PANELS

Designed to be as maintenance friendly as possible, the ASC P7 is fitted with fully opening panels for easy maintenance and servicing.

LARGE WATER TANK

The machine is fitted with a high capacity, 89L steel water tank. This ensures 100% dust control regardless of what is being swept.

WATER MISTING SYSTEM

The high-capacity 85L watering system effectively eliminates dust generation while using the side brooms.
