SERVICE & MAINTENANCE

Techquip's Service Team offers a range of comprehensive services to ensure your complete dust collection system operates effectively and minimises down-time.

Available Services:

- Servicing all types of dust collectors, silo vent filters, filter bags & cartridge media.
- Preventative Maintenance Contracts - helps significantly reduce failures, detect faults early, providing peace of mind.
- Emergency after-hours break-down services.
- Diagnostic assessments of your dust collection systems with suggested redesign & upgrades to improve performance.

Our Service Team is fully equipped with all the necessary resources to ensure that your equipment lasts as long as possible, leading to **lower operating costs and **reduced down-time.****

We can also supply the parts needed to repair all types of dust control equipment.
