BUCKET LOADS OF FEATURES TO SUIT AUSSIE SITES

COMMITTED TO RELIABILITY

At Toyota Material Handling, we know how important it is to keep your Huski on site working for you.

That's why after evaluating available technology alternatives, we purposefully decided to retain the reliability of solid-state electronics on the Toyota Huski 5SDK skid steer loader range. This minimises maintenance requirements and reduces possible machine downtime.

Some other features on our Huski 5SDK range include:

- All models use large-capacity and high pressure resistant HST motors
- The hydraulic fluid capacity has been increased maintaining fluid temperature at optimum levels
- Repositioning of the oil cooler improves cooling performance
- Pressure reduction rings for each of the lift and dump cylinders absorb impact when digging. This protects the gasket seal and improves reliability with respect to oil leaks
- Wedge-shaped pins that move vertically instead of horizontally secure the bucket in place and reduce noise during bucket operation (ISO hitch only)

COMMITTED TO AUSSIE CONDITIONS

Australia has some of the most rugged working conditions in the world, which is why Toyota Material Handling chose to develop and test the Huski 5SDK here. This means the Huski 5SDK is truly engineered to handle Australian conditions.

- Tested in varying conditions, from sub zero to high ambient temperatures
- Air conditioning and heating are available options to keep an enclosed cabin at a constant and comfortable temperature. An external air-intake port and air filter prevent dust from entering the cabin
- An alkyd paint has been replaced by a urethane paint for greater protection against rust and to reduce fading

COMMITTED TO THE OPERATOR

The Huski 5SDK has been designed around the needs of the operator. One of the main objectives was to design a machine that is spacious and comfortable. The easy-glide motion of the pilot lever enables effortless shifting, ensuring smooth operator control.

- Large left and right assist grips on the arms and pillars greatly improve the ease of getting on and off the machine
- A larger open cabin than the current model (by approximately 90mm vertically and 54mm horizontally), allows for easy entry and exiting of the machine
- A large seat enables the operator to sit and exit without hindrance. The seat can slide 150mm, with 10 adjustment notches to ensure optimal positioning can be achieved for operators of varying height and size
- Colour-coded operating switches are easy to recognise and laid out on the left and right instrument panels
- Easy-to-read digital meters on the left instrument panel make it easy to monitor fuel, oil and engine temperature
- New steps help prevent muddy work boots from slipping when entering and exiting
- Design innovations have reduced noise and vibration levels, providing for comfortable machine operation

TOYOTA HUSKI SKID STEER LOADERS 320KG-900KG OPERATING LOAD (SAE) HUSKI SDK MODELS

TOYOTA HUSKI SKID STEER LOADERS

320KG – 900KG OPERATING LOAD (SAE) HUSKI SDK MODELS

Toyota Huski skid steer loaders have long been renowned as the finest available. Strength, high performance and reliability have become synonymous with the Huski range. Developed and tested in Australia, the Huski 5SDK range features exceptional stability, driver comfort and safety. The soft touch control ensures fluent transition of the lever, allowing for precise manoeuvrability. The 5SDK range also provides owners with products that offer heavy-duty construction, low running costs and a longer machine life, adding true value to our customer's business.

ABOUT TOYOTA MATERIAL HANDLING

For over sixty years, Toyota has been at the forefront of the global industrial equipment market. Drawing on extensive experience gained in advanced automotive engineering and technology, Toyota Material Handling has become one of the global leaders in the production and distribution of material handling equipment.

HUSKI SUPPORT FOR STAYING ON TOP

At Toyota Material Handling, we recognise how important after-sales support is to your business to keep your Huski running. Our reputation may be global, but local service is our top priority.

Our commitment to total customer satisfaction extends nationwide thanks to one of the finest branch networks in Australia. We have major outlets for Toyota Material Handling Huski sales, service and parts located in every state and territory of Australia.

COMMITTED TO THE ENVIRONMENT

Toyota is dedicated to caring for the environment. This commitment is reflected in the environmentally-friendly design of the Huski 5SDK series, which is completely free of asbestos, mercury and cadmium, while the amounts of lead and hexavalent chrome used have been reduced to an absolute minimum.

Innovations in technology have enabled the development of a reliable and tough engine with low emission levels, embodying Toyota's environmentally conscious approach.
