

M-Span Shelving

The all new M-Span shelf is designed to last a lifetime for an affordable price. Made by over moulding a sub frame with Food Grade Polypropylene to produce a strong shelf in one process. This patented technique reduces the cost and the carbon footprint to benefit both the customer and the environment.

Shelf Sizes:

Shelf Widths of 300mm, 450mm and 600mm.

Shelf Lengths of 600, 750, 900, 1050, 1200, 1350 and 1500mm

Standard Shelving Heights:

3 tiers: 1200mm high

4 tiers: 1800mm high

5 tiers: 2000mm high

Weight Loading: M-Span shelves are rated to 150kgs evenly spaced per tier and a total of 750kg for a 5 tier unit.

Assembly: No tools are required and only 3 types of components are involved making assembly simple. Clear Access Corners and Add On bays use stainless steel M-Span shelf clips eliminating 2 posts.

Cleaning: M-Span shelves have large flat open surface areas and very few ribs are needed underneath: from 1 to a maximum of 7 ribs on the largest shelf sized 1500x600mm. The holes in the surface are flat on top and radius underneath to make wiping down easy.

Air Flow: The large flat open surfaces of the M-Span shelf enhance the airflow through the holes in the surface of the shelf.

Usage: Suitable for coolroom, drystore and freezer use. Temperatures from +90° to -30°C.

Better Mobility. Better Life.
