

NEW AG-28 Cantilever Umbrella

The AG28 cantilever umbrella is the perfect shade structure for a backyard or commercial premises.

AG28-3x3m SQ

AG28-3.5m OCT

Resin base

Bolt down base

AG28 Resin Base fits both octagonal and square versions of the AG28 umbrella. The Resin Base can hold up to 110KG of weights and can be filled with sand or there is an additional option of our 10KG weight bags that can be purchased separately.

The bolt down steel base is another option to support the AG28 umbrella. The Australian made stainless steel base is very compact with a 300 x 300 mm base plate specifically designed to be bolted down to suitable surfaces such as concrete or timbers decking, The compact design occupies very little floor space adding an elegant look to the umbrella.

Easy operation using handle to tilt and open the umbrella.

Canopy opening/closing Control

Tilting Control

This cantilever umbrella has a full 360 degree rotation and tilt feature.

Colour Range

BLACK
