

Squeeze&Turn

Squeeze, lift and rotate the object

Our electrical clamp and rotate module squeezes from the outside, lift and rotate.

Lifting both rolls, barrels, drums, cans and buckets, etc. Is controlled electrically from the controlbox at the handle. Controlled with a joystick for stapless rotary and pushbuttons to control the clamping function.

Available as a accessory to our Lift&Drive 90P, 125P, 175P and 225P.

For lifting and rotating.

Our electric Squeeze&Turn ideal for handling applications where you want to keep the core of the reel empty. Thanks to the art technology it makes your roll handling simple and precise.

Perfect for lifting and rotating of rolls, barrels, drums, buckets and boxes.

Handel the most materials with a max load of 110 kg. Can rotate 360 degrees and is easy to configure and adapt to different loads.

The Squeeze&Turn comes standard with a 300 mm stroke. An optional 500 mm stroke is available. The arms can be mechanically adjusted to fit larger or smaller loads and the clamp arms can be customized.

It requires a double command to open clamping pillar, to prevent the load from accidentally be dropped.

Made in stainless steel and aluminium.

Our lift trolleys are modular for maximum flexibility and customization.

Available with lifting caoacity from 60 up to 225 kg.
