Engineers Mat is an extremely heavy duty, comfortable, anti-slip mat used in demanding work areas such as engineering and mechanical workshops, steel fabrication areas and much more.

FEATURES

- Soft rubber compound relieves strains from constant standing.
- Honeycomb design surface provides grip in wet areas.
- Large drainage holes allow mat to drain keeping the surface dry which prevents slips.
- Bevelled edge option available in safety yellow, eliminating trips or falls on mat edges
- Heavy duty construction - resists common chemicals and hot swarf.
