Semi-Automatic Strapping  
Machine

#60330

Simple  
Operation

Single Motor  
Operation

Enhanced  
Portability

Affordable  
Solution

The Semi-Automatic Strapping Machine TS-300, also known as the Polypropylene Strapping Machine or Poly Strapping Machine, is economical, adaptable, and ideal for general-purpose strapping, ensuring a seamless and efficient packaging process. It also offers a compact footprint. The machine can easily fit into small spaces and be moved on castors as needed, allowing you to use it in various locations within your factory or warehouse.

## Features

- Rapid 2.5-second strapping
- Adjustable strap widths: 6mm, 9mm, 12mm, 15.5mm
- Customizable tension and feed length
- Ideal for bundling panels
- Cost-effective for industrial applications
- Freight savings by strapping two parcels together
- Simplifies strapping even on bulky packages
- Enhanced portability with caster wheels for versatile use
- Simple routine maintenance with a single motor
- Uses single-phase power for plug-and-play strapping
