

MLT 840/MLT 1040

AGRICULTURAL HANDLING solutions

 **MANITOU**

www.manitou.com

A COMMITMENT TO FARMING

As partners to the farming industry for more than 20 years, we know your business is **demanding**, and on today's modern farm the materials handling plays an important part in the daily farm handling jobs, so you can be sure you'll be able to find within our farming range **THE MANITOU** you need.

The MLT840 and MLT1040 telehandlers are the ideal choice for **performance**. Their impressive capabilities enable you to carry out all your **farm handling** tasks: animal feed, harvesting work, bulk loading

and unloading, straw and hay handling.

Arable, dairy and livestock farmers, cereal growers, cooperatives and agricultural contractors will appreciate the qualities of these machines. More than just a handling solution, MANITOU offers you a product which both looks good and is comfortable to use: inside and outside have been cleverly designed to satisfy you. These machines benefit from innovations conceived by our engineers and designers: JSM^{*}, digital dashboard display and ECS ^{**}, etc. You get greater **comfort** and **productivity**.

When you choose MANITOU, you can count on a fork lift truck for long term durability. You also benefit from the package of services provided by your dealer: after-sales service, servicing and maintenance contracts, on-site repairs and financing solutions.

Why all this? Because, like you, we take pleasure in a **job well done!**

* Joystick Switch and Move, patent applied for by MANITOU BF

** Easy Connect System: hydraulic decompression of the accessory line

PERFORMANCE ON YOUR FARM

4000 kg:

The MLT 840 and 1040 's maximum capacity allows you to move up to 4 tonnes and - better still - to tip up to 3 tonnes into a 4.5 m high trailer.

Up to 9.60 m:

The boom when fully extended is capable of lifting loads up to:

- 7.55 m (MLT 840)
- 9.60 m (MLT 1040)

3.74 m:

A turning radius that makes no compromise: performance means agility!

You choose

	Motors (HP)	Transmission	Gearbox	Pump type	Flow/pressure (l/min-bar)
MLT 840-115 PS	115	Torque convertor	M-Shift® with Lock-up	Variable flow	150
MLT 840-137 PS	137	Torque convertor	M-Shift® with Lock-up	Variable flow	180
MLT 1040-137 PS	137	Torque convertor	M-Shift® with Lock-up	Variable flow	180

The MLT 840 and 1040 have the new M-Shift® gearbox equipped with 5 speeds giving you smooth gear-shifts in all situations.

Goes anywhere

Agricultural profile tyres, high ground clearance, an impressive tractive effort and a regulated cooling system: you will be able to work efficiently in any situation. The MLT 840 and 1040 have been developed to help you manage your farm operations.

COMFORTABLE WORKING ENVIRONMENT

A new standard in agricultural telehandlers.

As we know you will be spending a lot of your time in your MANITOU cab, we wanted you to enjoy optimum **comfort and technology**.

The interior of the MLT cab leaves nothing to be desired with its excellent styling. The refined dashboard utilising the latest modern technology and the intuitive data available to the driver, all contribute to the **top of the range feel of the cab**.

The operator benefits from the latest ergonomic design for maximum driver comfort. The cab layout has been carefully planned to provide a **generous amount of space** and equipment perfectly suited to your needs are available as standard or on option: cloth seat, fully adjustable steering column (height/depth), sun visor, roof screen, electric window, air conditioning, automatic wheel alignment, all help to provide you with a comfortable working environment.

Exclusive to MANITOU, **JSM®** lets you control all movements with one hand safely and intuitively: raising and lowering the boom, extending and retracting, crowding and tilting, control over the hydraulic line to the attachment, forward/reverse direction of travel or switching the **M-Shift® gearbox** to manual. You always keep one hand on the steering wheel to maintain full control of your MLT.

The new dashboard features a digital information screen displaying the next maintenance period, the gear engaged, travel speed, boom angle, fuel consumption and lots of other information useful to your day-to-day work.

EACH TO THEIR OWN **STYLE**

Reacting to customer choice is a MANITOU principle. That's the reason you **can choose between** 3 levels of finish: **Classic, Premium** and **Elite**.

Because all your requirements are important, MANITOU provides you with complete peace of mind in all versions of the MLT.

COMBINE POWER AND PERFORMANCE

DESIGNED TO OPTIMISE POWER AND FUEL EFFICIENCY

Each telehandler must have a **suitable power unit** to give you the best engine/machine torque: too little power and you lose efficiency, too much power could increase consumption to no effect.

To transform minimum fuel into maximum efficiency, your MLT 840 and 1040 are fitted with a **John Deere 4.5 I** four-cylinder engine complying with Interim Tier 4/Stage IIIB standards and developing **115 HP** (MLT840 only) **or 137 HP**. These engines are equipped with an Exhaust Gas Recirculation (EGR) valve combined with a Diesel Particulate Filter (DPF).

The cooling system has been designed to offer **efficiency** and **economy**. Featuring an **electronic regulating device**, the cooling system controls the fan speed automatically according to engine temperature, leading to significant fuel savings. Equipped as standard with an **automatic air flow inverter**, your telehandler can "breathe" perfectly in all situations to provide excellent working conditions regardless of engine speed.

**Optimising the
power of your engine**

M-SHIFT® GEARBOX: SIMPLICITY AND EFFICIENCY

The new five-speed **M-Shift® gearbox** is designed for smooth gear changing in all situations. Two modes of operation are available: **automatic and manual**.

In automatic mode:

You shift from one gear to another with minimum torque interruption. The gearshift program adapts to the torque and speed demanded by the job at hand, and **determines the optimum gear automatically**. This lets you engage a low gear, for example, when you are towing a trailer on hilly roads to recover torque and speed.

You choose the top gear in which you wish to travel: **D, 4, 3 or 2**. In **D**, your machine will derive the full benefit of the five gears available to offer you optimum performance.

M-SHIFT® gearbox command unit

- 1** Gear selector
- 2** Hydraulic line A control
- 3** Hydraulic line B control

When handling silage or bulk handling grain, you may decide to go no higher than third gear. In this case, you select 3 and your MLT 840 or 1040 will take care of the gear changes, quickly and smoothly, but will never engage a gear higher than third.

In manual mode:

You decide which gear you wish to engage using the \oplus and $=$ buttons on the JSM®.

Lock-up :

The MLT 840 and MLT1040 are fitted as standard with a torque converter lock-up function which drives the transmission system directly over **23 kph in fourth gear** and **38 kph in fifth**. This system **improves the efficiency** of your machine, increases its tractive effort and reduces fuel consumption.

115* or 137 HP:

The 115 and 137 available horsepower offers efficient moderate fuel consumption on an everyday basis for maximum performance. *MLT 840 only.

Five-speed Powershift:

Designed for performance and economy, the new M-Shift® automatic gearbox fitted as standard on the MLT 840 and 1040 also offers you flexibility and comfort.

YOUR PARTNER IN PRODUCTIVITY

Save yourself time to concentrate on what matters - that's MANITOU's philosophy when it comes to handling: fast working cycles and driver comfort are good examples.

For maximum efficiency, MANITOU offers you a machine which is simple to use. **Quick and easy to learn** (JSM®, controls perfectly placed), your MLT840 and 1040 are the solution to all your farm handling duties.

Manœuvrability is essential! You will be able to do even more work: the more time you spend at the wheel of your MANITOU the more your efficiency will be increased.

With the **LSU** (Load Sensing Ultra) system using variable-displacement pumps up to **180 l/min**, movements can be cumulated for improved working efficiency. You can modulate the hydraulic speed of your boom head attachment in both directions by means of two flow regulators. Once you have set up the system to suit, you can for example **open** a bale clamp **quickly** and **close** it **slowly**, without even thinking about it! Very practical when handling bales of haylage!

Your productivity and safety depends on **attachments** that are tailored to your handler's **specifications**. When developing our machines we qualify the attachment that will be able to give you optimal performance and that comply with the norms in force. Choose a MANITOU approved accessory, the best choice for your MLT!

Some accessories:

Multifunction grab bucket

Bale clamp

Collector brush

Large volume manure fork

Silo unloader bucket

150* or 180 l/min:

The piston pump of your MLT 840, combined with the JSM®, delivers a maximum flow rate of 150 or 180 l/min for quick and accurate movements.

*MLT 840 only.

4 x 4 x 4:

4 wheel drive and 4 wheel steer = manœuvrability for getting out of all situations.

A REAL KNOW-HOW

Our **design department**, employing more than 200 engineers and technicians, have specialised in the design of agricultural telehandlers **for more than 20 years**. With more than 50 registered patents, our knowledge and expertise with regard to the structure of the machine offers you reliability and durability. A fully comprehensive testing procedure and "best practice" methods are applied to ensure quality manufacturing at all levels, utilising all the latest modern technology.

Specialists in agriculture, MANITOU develop their product range with the customer in mind, selecting components to suit the most arduous farm handling needs, **your machine like the MANITOU company is 100% dedicated to agriculture**: the tyres, transmission and even the cooling system have been logically chosen and assembled.

The assurance
of working
in total safety

A machine **100%** dedicated
to **agricultural** use

YOU ARE PROTECTED

Your working environment must above all be a safe area.

The excellent **stability** of the MLT 840 and 1040 combined with the aggravating movement arrestor allows you to handle maximum loads up to **4 tonnes** with complete confidence.

Your **safety** is further reinforced by the **presence detector** located in the seat. Travel movements are only allowed when you are sitting in the driving seat.

The cab has been especially designed to **protect** you. Satisfying **ROPS/FOPS*** requirements, withstanding rolling over, heavy objects falling and therefore prevents distortion to the cab.

A large window area, **laterally mounted engine**, low boom pivot as well as the high seating position gives you **360° visibility** guaranteeing both your own safety and that of everyone around you.

* ROPS: rollover protection structure
FOPS: falling objects protection structure
