

# 4 SIMPLE REASONS FOR LEG POCKET FOAM FILLERS

## 1 IMPROVE LONGWALL PRODUCTIVITY

Reduce cylinder cavities from being clogged with coal or debris, hampering operations, and creating unnecessary downtime for cleaning

## 2 REDUCE MAINTENANCE COSTS

Protect your longwall roof support leg cylinders from undue stress caused by build up of material in the leg pocket area.

## 3 ECONOMICAL ALTERNATIVE TO THE OEM PRODUCT

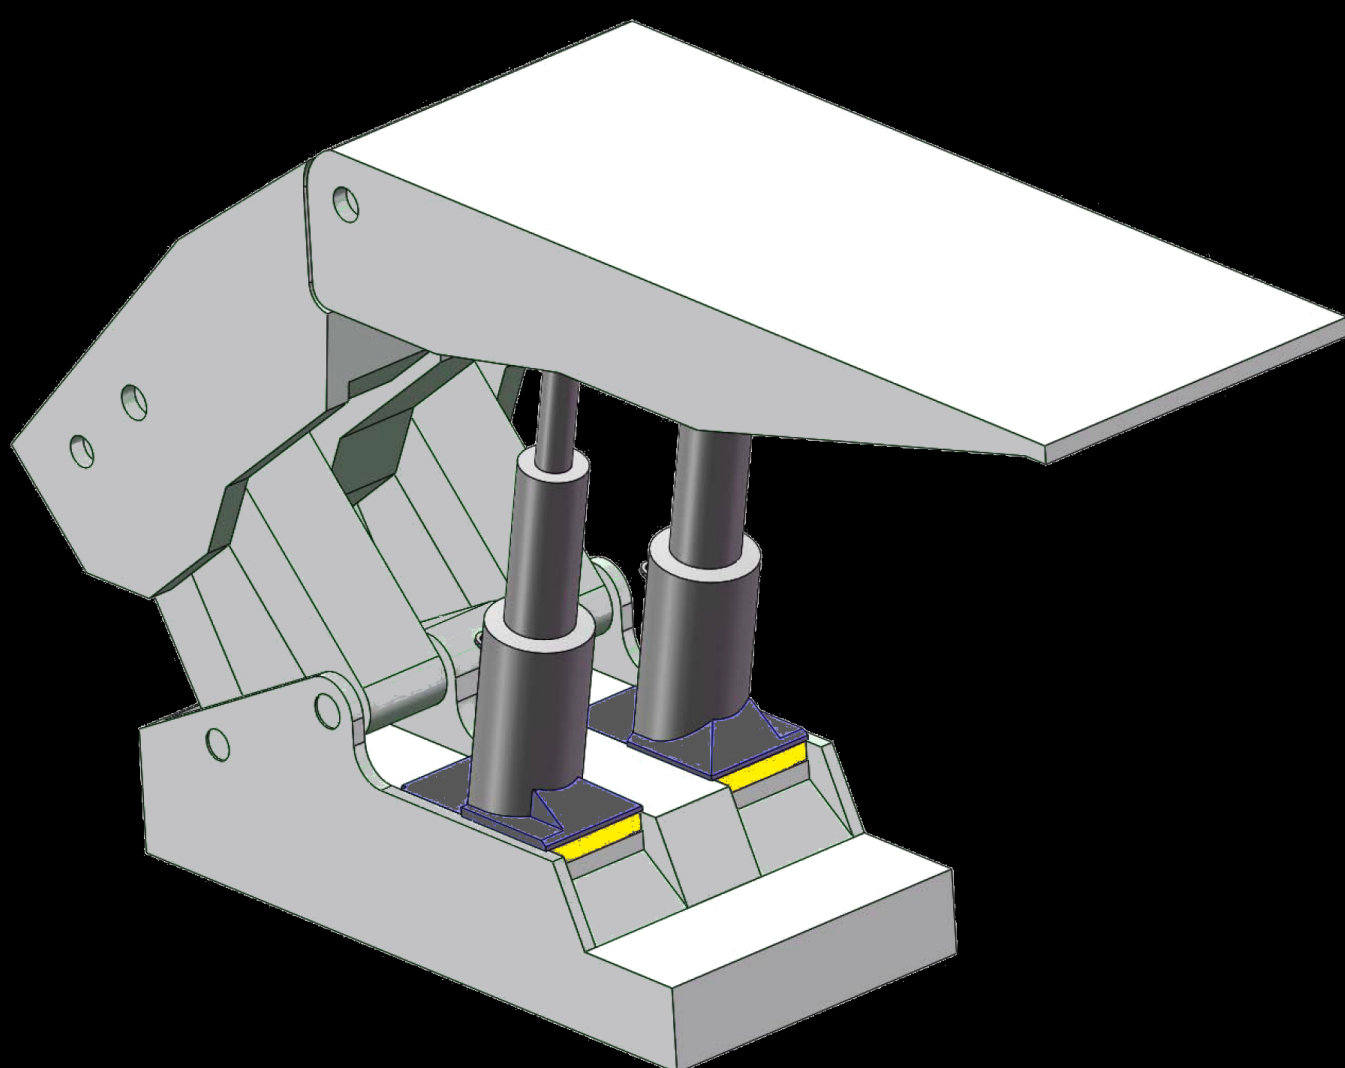

With a TEAM designed pocket filler you get an engineered product to your requirements at an aftermarket price.

## 4 AUSTRALIAN DESIGNED AUSTRALIAN MADE

Our product is fire retardant, flexible and robust. Our product doesn't just fill a gap it improves your productivity.

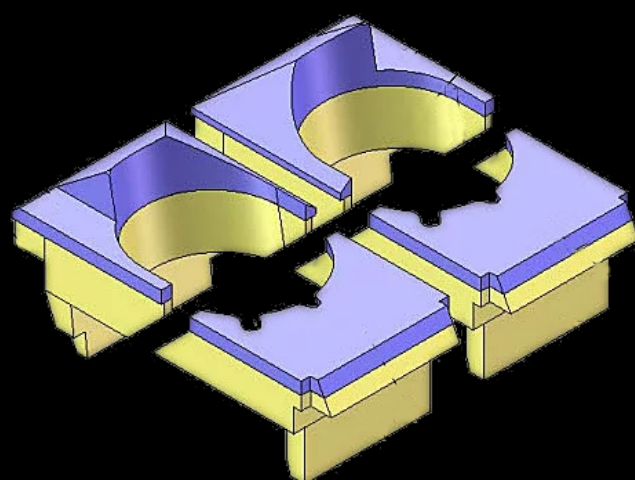

## **CUSTOM FIT FOR YOUR APPLICATION**

**To ensure the perfect fit for your longwall, we take measurements of your leg pockets and model a specific foam filler to fill the void.**

## **COAL SHEDDING TECHNOLOGY**

**We are able to include coal and debris shedding technology as well as steps to improve safety when traversing the longwall.**

## **SPECIFICATIONS**

**We can use different foam technologies to suit your individual application.**
