

HASTY SEARCH Kit™ – the all-in-one search and rescue kit

The Hasty Search Kit™ has been specifically configured for urban search and rescue teams, “enhanced” rescue squads, regional task forces and SUSAR teams who are seeking a high quality, easy to use, cost effective, all-in-one technical search system for their standard equipment cache. The Hasty Search Kit™ comes complete in one easy to store case and is designed to be both easily transportable and rapidly deployable anywhere disaster strikes. The kit includes the Delsar® LifeDetector® Mini system that provides seismic detection of victims and the all new SearchCam Recon III for visual search and location operations.

The equipment contained in the Hasty Search Kit™ is cross compatible with other members of our rescue product family: SearchCam 3000™, and Delsar® LD3 LifeDetector®. Batteries and chargers are completely interchangeable to assist with logistical issues such as battery management during full scale deployments or events.

Designed for following uses and industries

TECHNICAL DATA

KEY BENEFITS

- Ruggedized camera
- Seismic victim location abilities
- Heavy duty single storage case
- Rapid to deploy
- Interchangeable batteries
- Extremely cost effective
