

TANSUN SORRENTO SINGLE ELECTRIC INFRARED HEATING

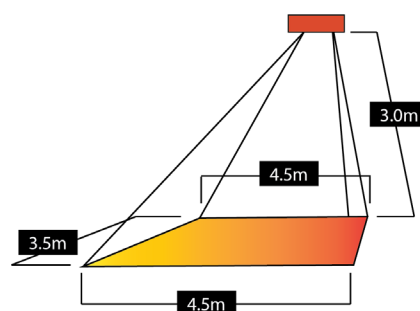

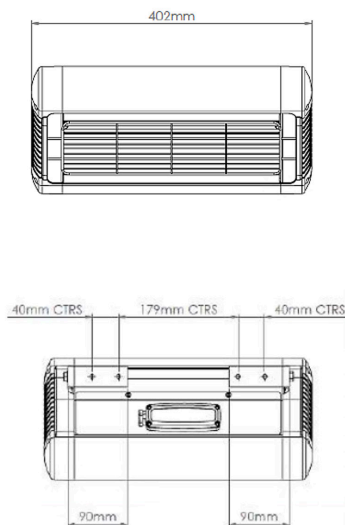

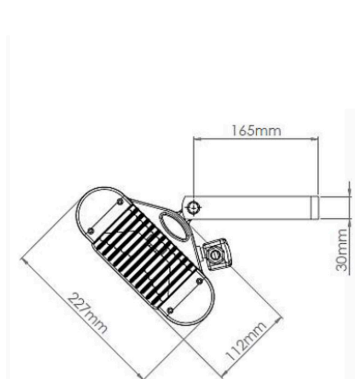

SORRENTO SINGLE

FOR ROBUST COMMERCIAL USE

Discover the Sorrento range of LOW GLARE high powered heaters, that add elegance to any outdoor or indoor environment. Ideally used where more heat is required in larger areas. The Tansun Sorrento Single can be mounted overhead providing flexibility at the time of installation. These models also come standard with two wall mounting brackets.

FULL SHORTWAVE TECHNOLOGY

The Tansun Sorrento Single is a robust weatherproof infrared heater. It is mounted on an adjustable bracket that allows the heat to be directed exactly where it is required, and its attractive, lightweight design means that it is effective yet unobtrusive. The Sorrento Single is available in 1.5kW and 2kW which is perfect for fitting into a multitude of environments.

Heater Supplied as standard with 2m power cable and plug top plus mounting brackets for wall ceiling installation

Hurll Nu-Way's Thermal Comfort range of products addresses the challenges of heating and cooling people and livestock in large buildings and open spaces. Radiant Heaters act like the sun, heating objects and people rather than the air.

Hurll Nu-Way offers radiant heaters powered by Natural Gas, LPG and electricity. To cool these spaces we offer HVLS fans, extraction systems and portable evaporative coolers. Where air conditioning is not viable, contact Hurll Nu-Way.
