USB Floor Cushion Sensor Mat & USB Y Cable (X = 1,2, or 3): MED-FM-04-6U(X)

Indigo Care provides a New USB pressure sensitive Premium Floor Cushion "Crash" Sensor Mat that is designed for residents who are at risk of falling out of their bed, or those who require assistance in arising from the bed or a chair. The USB connection is durable and robust with a low profile ensuring the cable is more secure and less vulnerable to breakages from external forces. Unlike other floor mats, our Premium Mats is a three-piece sensor mat made of 40mm foldable firm foam with a detachable USB "Y" cable to reduce trip hazard and damage to the electrical cord and provide an economical replacement cost if required. The USB Y-Cable is 3 meter long with a spare 6.3mm socket allowing the nurse call bell pendant to plug in as well so that either pressing the call button or standing on the mat will alert/trigger the nurse call system's alarm.

Once the resident leaves the bed or chair and steps on the floor cushion, the sensor mat will activate the nurse call system and alert the staff. Our Floor Cushion Sensor Mats provide the ultimate in Fall Injury Protection as we have added an extra 40 mm of foam padding in case the resident falls while attempting to stand or walk. This mat is designed to absorb and cushion the resident if they fall over at full impact. Our Premium Floor Sensor Mats are designed to work either with a cable (corded) or completely cordless with our Wireless Receiver and Transmitter.

KEY SPECIFICATIONS:

- USB Connection
- Dimensions : 750mm X 1800mm X 40mm (29.5" X 70" X 1.5")
- Silver Printing, Resistance < 150 Ohm
