

NEVAC

Presenting the world's first, one of a kind, oxygen powered suction system with a 500ml disposable canister. This NEVAC is designed to store bodily fluids that are drawn in from a connected aspiration device.

This Medical Device has many features. Some including:

- ✓ An integrated one-way bacteria filter
- ✓ Minimises the risk of cross-contamination
- ✓ Prevents spillage
- ✓ Highly cost effective
- ✓ Single patient use (disposable)
- ✓ Complies to Australian Standards
- ✓ Easy to use
- ✓ Easy seal cap

- Manufactured by RAPP Australia Pty Ltd and currently adopted by multiple Ambulance Services in Australia •

WWW.NEANN.COM.AU

is a division of RAPP Australia Pty Ltd

Pre-eminent supplier of pre-hospital emergency and rescue equipment for First Responder, Ambulance and Fire Services since 1983.

Provider of ancillary emergency products for all emergency situations including military, mining, diving and other recreational activities.

Shared Goals

We share with almost all of our customers these three foundation goals:

- Effectiveness
- Reliability and
- Safety of Use

We make it our business to help our customers to achieve their goals.

Shared Achievement

We successfully work with our customers to ensure that they can provide the most appropriate equipment and supplies to their personnel, both professional and volunteer, to assist them to complete their tasks successfully and ensure they return safely.

Future Commitment

To maintain our leadership position we commit to:

- continuously apply innovation to our existing products,
- work with our customers' design teams to develop new products
- constantly search the world for latest best-practice, and introduce those which fit as soon as practicable.
