Heater Supplied as standard with 2m power cable and plug top plus mounting brackets for wall ceiling installation

Hurll Nu-Way's Thermal Comfort range of products addresses the challenges of heating and cooling people and livestock in large buildings and open spaces. Radiant Heaters act like the sun, heating objects and people rather than the air.

Hurll Nu-Way offers radiant heaters powered by Natural Gas, LPG and electricity. To cool these spaces we offer HVLS fans, extraction systems and portable evaporative coolers. Where air conditioning is not viable, contact Hurll Nu-Way.
