

# PRO-LIFT LIFTING MAGNET

***DON'T LET THEIR SMALL SIZE FOOL YOU!***

***Single units available with up to 6 tonne lifting capacity.***

The Pro-Lift Lifting Magnets are a powerful tool designed for moving heavy steel sections, beams, and components. These magnets allow for operators to safely and easily lift steel material on and off trucks, cutting beds, guillotines, saws, etc.

Not only do the Pro-Lifts substantially save time and allow for increase in production, they also greatly reduce WHS risks such as back injury caused by lifting heavy steel objects.

The Pro-Lifts are one of the safest lifting magnet designs in Australia.

## SAFE

All units are fitted with an additional spring-loaded safety latch that prevents the load being discharged should the button on the handle be bumped or inadvertently activated.

Magnet Sales Australia is concerned about safety – each Pro-Lift Lifting Magnet is provided with a complete Safety & Instructions Manual.

## RELIABLE

- High quality and engineered with the operator in mind.
- Conforms with Australian Standard AS 4991-2004 Lifting Devices when fitted with safety latch.
- Load Test Certificates available upon request.

## LIFTING CAPABILITIES TO SUIT YOUR NEEDS

- 100kg
- 300kg
- 500kg
- 600kg
