

Photodynamic Therapy Device

KN-7000L

KERNEL'S LIGHT , SHINE YOUR LIFE

- External dimension: 490×470×1370mm (L×W×H)
- Quantity of LED: 1400pcs
- Irradiation area: 900cm²±10%

Product Introduction

- High power SMD-LED light source, 3D simulation matrix arrangement
- Four light sources integrated to meet different clinical needs
- Pre-stored 5 treatment programs, one click selection, sequence consecutive 4 colors within one irradiation program
- Free lifting arm, treatment head can be fixed at any position and angle
- AI intelligent temperature control system ensures safe treatment
- Built-in infrared ranging function to ensure precise treatment distance
- Intensity calibration function
- Continuous and pulse irradiation work modes
- Dual protection of button switch and password
