

Alma Hybrid™

The **Future** of Skin Rejuvenation

The Alma Hybrid is the world's first combined fractional laser technology that provides an unparalleled approach to ablative and non-ablative laser for revolutionary skin rejuvenation and scar treatment. The platform incorporates three core energies, providing a customisable combination of ablative, coagulative and thermal effects for remarkable results.

Treatable **Indications**

Fine Lines

Scars

Pigmentation

Skin Laxity

Wrinkles

Benign Lesions

Maximum Efficiency

Minimal Downtime

Customisable

Welcome to the **future**.

Tools of a Master craftsman

CO₂ & 1570nm Applicator

ProScan

Our flagship applicator: the ProScan is a highly-advanced, automated scanner that creates aligned, ultra-rapid, sequential, focused lasing beams. It is enhanced with unique features, that include its award-winning ergonomic design, a cooled tip for enhanced patient comfort, and the ability to customise every treatment for almost every skin type.

Ultrasound Applicator

Impact - The 'TED'

Our patented ultrasound technology creates an acoustic pressure, enabling the delivery of cosmeceuticals into the skin through the micro-channels created by the ProScan applicator.
