

Rigid Bund Filter with filter cartridges

Instead of pumping out and disposing of oil and water or fuel and water mixes, fit the AES Bund Filter to the bund outlet.

The bund filter captures hydrocarbons and particulates but allows clean water through. It reduces hydrocarbons to less than 5 mg per Litre, which means no rainbow film on the surface and it's disposable to storm water by most permits.

The filter can be made to fit any outlet to protect against storm water pollution. It can pay for itself after eliminating just one costly disposal. Replacement filters are easy to change.

IDEAL FOR:

- Permanent installation on your bund drain outlet.

TIPS:

- Designed for gravity drainage outlets only. Ask us before using with a pump or under pressure
- Replace cartridges after every 10L of absorbed hydrocarbons. When full, the filter blocks the bund outlet.

Code	Title	Qty	Size
AES BF 150	Rigid Bund Filter with filter cartridges	1	150mm Dia x 600 mm long
AES BF C 100	Absorb Rigid Bund Pre Filter Cartridge	1	100mm long x 155mm dia
AES BF C 100/10	Absorb Rigid Bund Pre Filter Cartridge Pack of 10	1	100mm long x 155mm dia
AES BF C 500	Absorb Rigid Bund Pre Filter Cartridge	1	500mm long x 155mm dia
AES BF C 500/10	Absorb Rigid Bund Pre Filter Cartridge Pack of 10	1	500mm long x 155mm dia
