# VEGETABLE WASHERS

Some areas around the washing tank have the purpose to gather all dirty materials and to guarantee the proper working of the washing cycle's phases.

A frontal filtered zone catches the superficial dirty; a second backward zone guarantees the correct filling levels functioning.

A lower little tank collects finally the dirty that's on the tank bottom

## What's in it for **YOU?** Vegetable washing-drying machine

As a result of careful researches and years of experience, the A81-ek washing-drying machine is a model of advanced technology quality in the International Market.

A "complete" machine that includes all those characteristics of efficiency, functionality and hygiene which makes it an essential component of the modern kitchens. Salad, fruits and vegetables washing usually needs a lot of time and energy to obtain an extremely clean and fresh product. To obtain it, it's also necessary not to handle in a wrong way the products, otherwise their freshness could be damaged

### Advanced Electronics

Totally automatic and with advanced performances, the new A81-ek washing-drying machine is the ideal solution for the washing of every kind of vegetables.

The soft-touch membrane keyboard with digital display to show the washing operations is simple and intuitive. The selection of the required program is really eas. The pressure on a clearly visible button starts the required program.

The various duration of washing (2 minutes) and centrifuging (30 seconds) are pre-programmed in accordance with 10 different programs developed depending on the different kinds of products.

It's possible to choose among 3 washing durations (2'-3'-4' or 3'-5'-7' minutes).

The constructive features are the same of the model A81-ek. Some optional functions are available as in the technical data.

## Versatile & Complete

Thanks to its high versatility, it's possible to modify the cycle durations according to the user's requirements. This allows to vary the times during which vegetables are exposed to the washing and always guarantees excellent washing result.

A simple and intuitive program thanks to the luminous display, which shows all the current

operations. The display shows the different washing, rinsing and centrifuging times and, at the end of the cycle, it's possible to know the total taken.

It's moreover possible to govern different alerts and visualize the tank water filling levels which act on the sequence of the different washing, rinsing and centrifuging phases. An acoustic signal informs that the cycle has finished

# WATER RECOVERY/ REGENERATION UNIT VR-81

 VR-81 Does not come with machine

## The innovative solution that allows to save considerably in water consumption and to increase the productivity of your **Vegetables Washing-Drying Machine**

Coupled with the water regeneration unit VR-81, your Vegetable Washing-Drying machine A81-EK becomes (GREEN).

The new regeneration tank allows to recover the water used during the wash, regenerating it partly for the next cycles, reducing this way excessive wastes of water.

### **Water recovery/regeneration unit to be combined with the A81-EK vegetable washing machine**

- Reduces the total consumption to just 5 liters of water per cycle
- reduces washing time by 25%
- Stainless steel regeneration tank
- Recovery pump incorporated
- Drain Valve
- 10 Programs

**Reduces water consumption by 40 Liters per cycle**
