

## Introducing the NEW AccuVein AV500

### AccuVein AV500 TECHNOLOGY

- Projects a map of the vasculature on the surface of the skin in real time
- Assessment tool to visually verify vein patency and avoid valves and bifurcations
- Detects veins to a depth of 10mm
- Vein centre-line accuracy to less than the width of a human hair
- Handheld, lightweight and portable
- No calibration, adjustment or preventative maintenance required
- Medical grade design with no vents or openings, allowing the device to be easily wiped clean or bagged for use in sterile environments
- Single button start up, minimal training required
- Brightness level and inverse mode settings
- Up to 2hrs usage on a single charge, and optional time out/stay on setting
- Hands free options and disposable protective covers available

Utilised  
by over **300**  
facilities across  
Australia

### PARTICULARLY USEFUL FOR CHALLENGING PATIENTS:

- Bariatric
- Dark skin
- Paediatrics
- Oncology

AccuVein Vein Visualisation is Emerging as the Standard of Care \*

**39%**

Pain Reduction

**3.5x**

1st Stick Improvement

**45%**

Fewer Escalations

## PROCEDURES

Vein visualisation helps clinicians succeed in many procedures:

**Vascular**

**IV Starts**

**Blood Draw**

**Cosmetics**

## ECONOMIC benefits

- Avoid treatment delays
- Less use of IV start kits
- Reduced risk of catheter related infections
- No consumable costs or ongoing costs

## CLINICAL benefits

- Increased first attempt success rates
- Identification of valves and bifurcations
- Non-contact, avoiding cross contamination
- Fewer escalations to PICC/central lines

## Hands-free accessories

### HF570 Powered Wheeled Stand

The hands-free stand can be wheeled to the patient allowing a clinician to perform a procedure without an assistant.

Using the ball joint arm, the AccuVein can be precisely positioned to keep the selected vein highlighted. The HF570 charges the device while it is in the secure "quick cup" of the stand.

### HF510 Flexi Arm

For the caregiver who doesn't stay in one place, this portable hands-free solution consists of a pole clamp and a flexible arm.

This configuration comes with a clamp that can attach to poles such as a rounded bedrail, an IV pole or flat surfaces. Just attach it and your hands are free to perform the procedure.
