- Selectable Nurse Call Functions: Momentary and Latching
- Power Supply Input Range of +12 VDC to +30 VDC
- Hospital Grade PVC Cable
- Headphone jack
- Cable Length – 1.8 M
- Design Patent in Australia

Indigo Care has designed an Australian Registered Nurse Call Entertainment Handset with total infection control in mind. The push buttons and blue sleeve are soft silicon with anti-microbial protection which is a critical property for infection and pathogenic micro-organism control. The patent designed speaker with window shutter protects the handset from dust and water whilst being rated at IP67. With its aesthetic and lightweight design, yet durable construction, the handset offers an easy grip and handling to its users. The blue silicon jacket makes the handset more hygiene, lends itself to eliminating slippages and is softer to the touch. You can plug the handset directly into the wall plate or with an optional adaptor dongle. The handset is also backward compatible with most existing systems in the industry.

- ***Easy to Use***
- ***Cost Effective***
- ***Integrates to most Nurse Call Systems***
