Dräger

Accessories

for neonatal and pediatric care

Dräger. Technology for Life®

D-15030-2018

Dräger original accessories – for your most fragile patients

Original accessories by Dräger – quality you can count on

Every day you and your staff stand up to the challenges of working under pressure, including long working hours and budget constraints, all the while focusing on delivering quality patient care. As Your Specialist in Acute Care, we support you to provide the best possible care for your patients' safety and wellbeing. Our medical accessories are designed to improve your clinical processes and help you to unlock the full potential of your equipment – with quality you can depend on.

Quality pays off

Caring for the smallest and most fragile neonatal and pediatric patients through the entire clinical patient pathway, you need and expect dependable life-saving equipment. Our extensive range of accessories are an integral part of that equipment. Through rigorous testing, original Dräger accessories not only fulfil international standards, they also meet our own strict quality standards.

Ideal solutions – designed with your needs in mind

Suitable for a wide range of clinical applications, we supply you with over 2,000 accessory item solutions. From breathing masks to flow sensors to disposable and reusable breathing circuits, we design and develop all our products according to your specific requirements.

Tested for optimal safety and compatibility

Patient safety is above all else. To ensure precise conformity and interoperability between device and accessory, our original accessories are thoroughly tested in combination with the respective Dräger device and connectors. This means your Dräger devices operate at their full performance potential helping to ensure optimal patient care.

1. Labor and Delivery

Dräger Babyroo® TN300

The Babyroo® TN300 is a configurable open care warmer with state of-the-art thermoregulation capabilities as well as advanced integrated technologies to support emergency resuscitation and family-centered care. From the labour & delivery room to the neonatal intensive care unit to the final discharge, the Babyroo® TN300 is scalable to use in a variety of hospital environments along the patient pathway.

- Two combined heat sources
- Central and peripheral temperature monitoring
- Resuscitation module with AutoBreath® and gas mixer options
- SpO_2 and pulse rate measurement
- Integrated scale and pass-through X-ray tray
- Integrated APGAR and SpO_2 pre-ductal target tables
- Features to support developmental care practices

D-36933-2021

Heated gel mattress

The combination of conductive heat of the heatable gel mattress and the radiative heat of the radiant warmer enables a gentle and low-stress warming therapy with reduced fluid loss for premature patients. The mattress is made of high-quality silicone and thus provides a comfortable lying feeling.

Resuscitaire®

The Resuscitaire® is the ideal device to have during labor and delivery procedures. It combines an effective warming therapy platform along with the components you need for clinical emergencies and resuscitation.

- Integrated APGAR timer
- Alarm free pre-warm function
- Integrated suction
- Resuscitation module with AutoBreath®

D-30714-2011

Disposable breathing circuits

Dräger offers a wide range of disposable breathing circuits for different applications. All disposable breathing circuits are made of high quality material and all gas leading components are PVC -free (no harm through softeners like e.g. DE HP) and biocompatiblity tested.

Dräger focuses on the interaction between the Dräger device and the related breathing circuit. System combatibility declarations represent the intensive testing which was completed in various scenarios based on our extensive experience concerning device and accessory interactions.

Oxylog® 3000 plus

Offering high ventilation performance with features such as AutoFlow®, integrated capnography and non-invasive ventilation (NIV), the compact and robust Oxylog® 3000 plus helps you transport your patients safely and provides feedback on correctness of intubation and ventilation effectiveness.

- Non-invasive ventilation
- AutoFlow® (optional)
- Integrated capnography (optional)
- Tidal volume of 0.05 to 2 liters (1.69 to 67.63 fl. oz.)

MT-5809-2008

Oxylog® VE300

The straightforward and user-friendly Dräger Oxylog® VE300 is built to face your challenges in preclinical emergency services. With reliable ventilation technology, robustness and intuitive operation, it provides you with reliable and safe assistance in an emergency.

- Preset parameters for fast ventilation start (adult, child, infant)
- VC-CMV / VC-AC, VC-SIMV, PC-BIPAP*, SPN-CPAP/PS with NIV, PS
- For patients with a tidal volume of 50 mL upward
- Capnography: main-stream CO_2 measurement

3. Neonatal/Pediatric Intensive Care Unit (NICU/PICU)

Babyleo® TN500 IncuWarmer

The Babyleo® TN500 is Dräger's first IncuWarmer that provides optimal thermoregulation for neonates in open care, closed care and transition. With the combination of three heat sources, this device protects your little patients so they can grow while making your workflow easier with quick and comfortable access to the baby.

- Redefining Thermoregulation – Keeping the temperature stable
- Welcoming family centered care
- Designed with infection prevention in mind
- Making your workflow easy and more efficient

D-43871-2015

Incubator Cover
The specially designed incubator cover protects the neonate from bright light and helps implement a day and night rhythm. The phototherapy flap enables the use of phototherapy without disturbing other patients in the room.

Softbed Mattress
Thanks to the viscoelastic foam core, the Dräger Softbed mattress supports patient comfort. The design takes into account the special needs of sensitive, immature skin. The soft material minimizes conductive heat losses, which helps contribute to the positive development of the infant since cold stress can be avoided.

Babyleo® Cuddly Toy
Mom holds the toy. The infant can smell her sent for comfort.

Caleo®

The Caleo provides an ideal microenvironment for neonates by delivering advanced thermoregulation parameters. The Caleo was designed to offer intelligent accessibility and the nurturing power of developmental care. It brings ease of use and practical benefits to infants, caregivers and pare

- Thermomonitoring
- Servo and automatic humidity control
- External electronic tilting mechanism
- Unique Kangaroo Mode
- X-ray without opening sidewall
- Quiet operation

MT-1213-2004

SoftBed™

The Dräger Softbed has been especially designed for neonates. The medical grade viscoelastic memory foam ensures highest comfort for our tiny and fragile patients, while relieving pressure points and preserving skin integrity. The foam is highly ventilated and even washable.

Isolette® 8000 plus

Dräger sets the standard for thermoregulation with a host of performance features designed to provide a stable, cocoon-like environment for the baby. To ensure that the Thermo-Neutral Zone is maintained, the Isolette® 8000 plus enables you to continuously monitor both the central and peripheral body temperature.

- Focused on Developmental Care
- Designed with your workflow in mind

Isolette® 8000

Our ability to reliably sustain a stable thermo-neutral microenvironment has made Dräger a trusted resource in thermoregulation. The advanced thermoregulation system in the Isolette® 8000, controlled by Dräger's elaborate PID algorithm, works to keep the baby's temperature stable.

- Dual air curtains
- Dual access panels
- Removable water reservoir and integrated evaporator for complete and easy cleaning

D-15738-2014

Incubator Cover

The specially designed incubator cover protects the neonate from bright light and helps implement a day and night rhythm. The unique phototherapy flap enables the use of phototherapy without disturbing other patients in the room.

NEONATAL/PEDIATRIC INTENSIVE CARE UNIT (NICU/PICU) ▪ THERMOREGULATION ▪ CLOSED CARE

Isolette® C2000

Combines the essential microclimate neonates need to thrive with the ergonomics, accessibility and mobility required in today's NICU environments. With its compact design and small footprint it fits easily into almost any NICU design.

- Thermomonitoring
- Dual air curtain
- Humidification
- Front and rear double-wall design

Dräger Babyroo® TN300

The Babyroo® TN300 is a configurable open care warmer with state of-the-art thermoregulation capabilities as well as advanced integrated technologies to support emergency resuscitation and family-centered care. From the labour & delivery room to the neonatal intensive care unit to the final discharge, the Babyroo® TN300 is scalable to use in a variety of hospital environments along the patient pathway.

- Two combined heat sources
- Central and peripheral temperature monitoring
- Resuscitation module with AutoBreath® and gas mixer options
- SpO_2 and pulse rate measurement
- Integrated scale and pass-through X-ray tray
- Integrated APGAR and SpO_2 pre-ductal target tables
- Features to support developmental care practices

D-36933-2021

Heated gel mattress

The combination of conductive heat of the heatable gel mattress and the radiative heat of the radiant warmer enables a gentle and low-stress warming therapy with reduced fluid loss for premature patients. The mattress is made of high-quality silicone and thus provides a comfortable lying feeling.

Babytherm® 8004/8010

Dräger's Babytherm® infant warming systems sets standards in open care – supporting premature and full-term neonates with a unique thermal environment, while giving you ease of access so you can provide the best possible care.

- SmartSwivel radiant heater
- ThermoMonitoring
- Quick heat up
- Heated conductive gel mattress (Babytherm® 8010)
- X-ray tray (Babytherm® 8004)
- Integrated Phototherapy option
- Integrated scale option

MT-1223-2004

Warm Gel Mattress

The soft feel and soothing comfort of the actively heatable gel mattress enables the reduction of the radiant heater output, which in turn reduces insensible water loss. In addition, the combination of conductive warmth from the heated gel mattress and radiant warmth from the overhead heater allows you to warm up cold babies quickly.

Developmental Care

Developmental Care is the human counterpart to high tech medical and pharmacological care in the NICU and seeks to look at each infant individually, using the infant‘s response as the guide for delivering care. Healthcare professionals not only have to assure the infants’ survival, but have to optimise their developmental course and outcome. Even in the absence of disability, there are high reported rates of difficulties in attention, behaviour and cognition. Greater emphasis is now being placed on improvement of neurodevelopmental outcomes.*

Appropriate covers for the incubators dampen light and noise. The design and functionalities of Babyleo TN500 as well as it’s accessories like the hood cover, transform an incubator into a cozy space and minimizes the disturbances coming from the surrounding equipment. This also comforts the parents, giving their child the best temporary "home" possible.

* Kenner A, McGrath J, NANN, Developmental Care of Newborns & Infants: A Guide for Health Professionals (Developmental Care of Newborns & Infants: A Guide for Health Professionals). Mosby. 2004; Bustani P C Developmental care: does it make a difference? Arch Dis Child – Fetal and Neonatal Edition 2008;93:F317-F321.

Babylog® VN800 and Babylog® VN600*

In order to prevent pulmonary injury, immature lungs and underdeveloped breathing require extremely gentle ventilation and advanced technology. Babylog® VN800 and VN600 provide high-performance ventilation capabilities from conventional to high-frequency oscillation, non-invasive ventilation as well as oxygen therapy*.

- Set of treatment tools in order to apply lung and brain protective ventilation strategies
- Ease of use with a tablet-like operating philosophy
- Flexible workplace integration and transport option

*Not all products and functions are available worldwide.

BABYFLOW® PLUS – ACCESSORIES FOR NON-INVASIVE RESPIRATORY SUPPORT

We want your patients to feel comfortable. The less discomfort a patient experiences, the greater the opportunity for healthy growth and development.

The BabyFlow® plus respiratory support system is designed to address the current issues with non-invasive respiratory support therapy. Every single component, including individually sized masks and nasal prongs, has been engineered to maximize performance and patient comfort.

ACCESSORIES FOR BABYLOG® VN800 AND BABYLOG® VN600

A	VentStar® Helix, dual heated (N) plus	MP02650
B	VentStar® Helix, heated (N) plus	MP02608
C	Humidifier Chamber (N), disposable, 10 pcs.	MP02590
	Reusable Breathing circuit (N), 900MR782*	MP17128
D	CO_2 cuvette disposable, pediatric, 10 pcs.	MP01063
E	CO_2 cuvette reusable, pediatric, for CO_2 sensors 6871500, 6870300, 6871950	6870280
	CO_2 mainstream sensor, for Evita® Infinity® V500, Babylog® VN500 and V(VN)600/800, Infinity® M540 and Oxylog® 3000 plus, reusable	6871950
F	Medication nebulizer Aeroneb Pro	MP01010
G	Nebulizer unit with filler cap for Aeroneb Pro	MP01030
H	T-piece set with plug for Aeroneb Pro (N), 15 mm (0.6 in), w/ adapter 10 mm (0.4 in), 5 pcs.	MP01032
I	T-connector for Aeroneb Pro (N), 12 mm (0.5 in), with plug, 5 pcs.	MP01037
J	Pneumatic medication nebulizer (P/N)	8411030
	Demo lung to simulate neonatal lungs, with suitcase	8418077
	Neonatal Test Lung, reusable, 50 ml, 1 pc.	MP20050
	Expiratory valve, for neonatal/pediatric patients (Non-RFID), reusable	8415296
K	Neonatal flow sensor ISO 15, PSU, reusable, (N/P)	8411130
	Insert for neonatal flow sensor, PSU, sterilizable, 5 pcs.	8410179
	Flow sensor cable for V-series with Neo option and VN-series	8416600
	Silencer	8415230
	Membrane, complete (for exhalation valve)	8413661
	Humidifier holder chassis, swiveling	G93111
	Humidifier holder for side rail	8416325
	Universal holder with DIN rail	G93140
	Rail clamp for F&P humidifier	8411074
	Gas bottle holder	G93110
	Water bag holder 900 MR 290	MP01008
	Holder, lateral (F&P 900 MR 309), including 8411074	MP01009
	Bedside rail claw for bed coupling	8419801
	Pressure reducer OxyLine for bottle operation	MP00100
L	Hinged arm Infinity® ACS	MP00690
	Hinged arm 240°	8409609
	Hinged arm Quickstop 2, w/ universal ball holder system	2M85706

Babylog® VN500*

The Babylog® VN500 provides comprehensive, state-of-the-art ventilation therapy for neonatal and pediatric patients. Conventional and non-invasive ventilation functionalities offer the clinician a wide range of modern therapy and monitoring assessment tools in a single device.

- Smart Pulmonary View
- Flexible transport and back up solutions
- Sensitive proximal triggering system
- Intuitive user interface with color touch screen
- Comprehensive conventional ventilation options
- Non-invasive respiratory support modi and oxygen therapy
- Powerful High Frequency Oscillation**

D-73341-2012

*Component of Infinity® Acute Care System Workstation Neonatal Care.
**This functionality is not available in the US.

Babylog® 8000 plus

If you use a Babylog® 8000 plus, you can be sure you're giving the little patient in your care the best possible ventilation. Whatever mode you require – CPAP, IMV, triggered modes such as SIMV, SIPPV, Pressure Support Ventilation or Volume Guarantee – the Babylog® 8000 plus can meet your demands.

An operating concept designed to fit to your needs as a user and a tailored monitoring system serve to optimize ventilation. This frees you from many arduous tasks usually associated with device operation so you can spend more time concentrating on your little patient.

- Pressure support ventilation
- Volume Guarantee
- BabyFlow® system for non-invasive respiratory support
- Easy operation, ergonomic design

Evita® V800, Evita® V600, Evita® Infinity® V500 and Evita® V300

In intensive care, where the patient range covers adults, infants and neonates, one ventilator for all patient types is often desired. The option Neonatal ventilation for Evita® V800/V600 and the option NeoFlow® for Evita® Infinity® V500 and Evita® V300 provides precision ventilation for patients of every age.
The options offer flow measurement at the Y-piece. This provides precise, compliance-independent volume monitoring of the patient system hose and allows accurate and responsive triggering in neonatal patients.

- Proximal flow sensor at Y-piece for precise flow/volume monitoring and quick trigger response
- Down to 2 ml in volume control ventilation
- Pressure control and volume guarantee with AutoFlow®
- Automatic leakage compensation (ATC®)
- Continuous base flow of 6 L/min
- Compensation of hose compliance

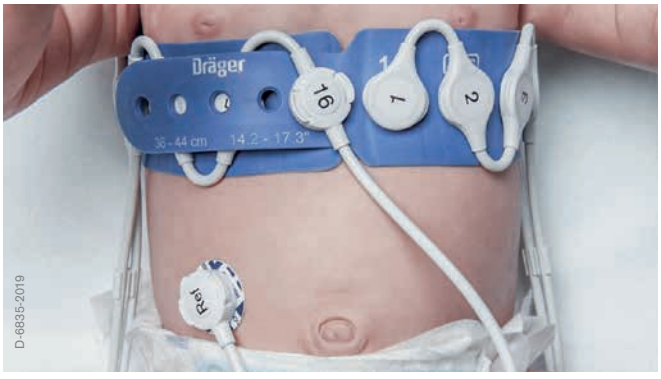
Dräger PulmoVista® 500
Electrode belt and patient cable for pediatric patients

PulmoVista® 500 enables assessment of regional ventilation distribution as well as changes in endexpiratory lung volumes. You can observe the effects of therapeutic manoeuvres and monitor the results over time. With these insights, PulmoVista® 500 helps you maintain the best possible distribution of air within the lungs. Electrical impedance tomography visualizes adverse effects such as atelectasis, overinflation, air-trapping, pleural effusion or pneumothorax.

D-5534-2010

Clinical Scenarios[1)]

- Assessing response to recruitment maneuvers and PEEP optimization.
- Detecting pleural effusion.
- Assessing the effect of position changes.
- Assessing weaning progression.



D-6835-2019

Dedicated electrode belt and patient cable for pediatric patients: from infants to adolescents. Making ventilation visible and enabling truly personalized respiratory therapy.

D-6836-2019

Following the patient's anatomy. Electrode belts in sizes 4XS and 3XS have a cutout for the armpits which allows the correct belt placement.

[1)]Davies et al., "Clinical Scenarios of the Application of Electrical Impedance Tomography in Paediatric Intensive Care." Scientific Reports Volume 9. 2019

Seattle PAP* plus/Seattle PAP* Non invasive respiratory support for neonates and patients up to 10 kg

Helping infants with respiratory distress breathe easier. The Seattle-Positive Airway Pressure (PAP) system is an innovation, which uses the proven advantages of Bubble CPAP therapy, such as oscillatory effects similar to high frequency ventilation and combines it with an unique design. Seattle PAP / Seattle-PAP plus is effective and easy to use.

It was designed to:

- Promote infant safety with a uniquely designed pressure manifold with pressure relief valve.
- Safety tube lock to avoid unintended changes of the PEEP level.
- Provide comfort and optimum CPAP support to the infant due to disposable BabyFlow® interfaces complementing the system.
- Include funnel with the filling tube which minimises spillages.
- The swivel connector to the expiratory limb prevents unneccessary disconnections and pressure loss.
- The water trap in the expiratory limb prevents unwanted presssure peaks due to condensation in the expiratory limb.

It requires only oxygen and compressed air, both to be administered by an O_2 blender like the Oxymixer from from Dräger and a humidification source for the circuit.

*Availability of the version depending on the country.

ACCESSORIES FOR SEATTLE PAP/SEATTLE PAP PLUS – BUBBLE CPAP SYSTEM

A	Seattle PAP plus	MP02260
B	Seattle PAP	MP02250
C	Multi-P trolley* equipped, including base with 5 castors, Ø 38 mm (1.5 in) pole, 3 rail clamps, basket	MP13020
D	Multi-P trolley*, including base with 5 castors and Ø 38 mm (1.5 in) pole for accessories	MP13021
	Trolley	5790148
E	Universal holder profile 30 × 5 for wall rails 25 × 8 to 35 × 10 mm, for secretion jars Medela	MP00634
F	Adapter, with 6 mm nozzle, e.g., for disposable breathing masks, 9/16“ connection	MP00416
G	Rail clamp for F&P humidifier and Seattle PAP bubble box*	8411074
H	Rail clamp, for attachment to poles of different diameters, rotable by 90° to left and right, length of standard rail (profile 25 × 10 mm): 20 cm	2M85274

Oxymixer configuration

	Configurable Oxymixer**	MP04200

BabyFlow® plus – accessories for non-invasive respiratory support

The BabyFlow® plus respiratory support system was designed based on the results of state-of-the-art technology (Computational Flow Analysis) to minimize the imposed work of breathing for the patient. The streamlined adapter head optimizes the flow distribution.

The flexible, kink resistant hoses enable optimal positioning of the patient. Swivel connectors reduce the necessary disconnections of the breathing circuit to a minimum, thus ensuring stable CPAP pressures.

More stable CPAP levels reduce noise levels, making the BabyFlow® plus a low noise level respiratory support system, therefore, supporting Developmental Care practices and offering the best possible therapy for your tiny patients.

ACCESSORIES FOR NON-INVASIVE RESPIRATORY SUPPORT – BABYFLOW® PLUS

Active Humidification – Aquapor H300

During mechanical ventilation, the natural warming, humidifying and secretion transport functions of the upper respiratory tract are compromised. In patients who require mechanical ventilation for longer periods, it is vital that measures are taken to mitigate these effects and reduce the likelihood of serious ventilator-associated lung infections (VALI).[1)] The Aquapor H300 provides optimally conditioned breathing gas, compensating for the heat and water loss caused by artificial ventilation with cold, dry medical gases.[2, 3)]

- Three operating modes - NIV, IV and FREE
- Simple, three stage adjustment of the humidification level
- Adjustable heating power level of the expiratory hose
- Automatic water level detection
- Large 3.5" TFT-colour display

Literature

1) Williams R, Rankin N, Smith T, Galler D, Seakins P. Relationship between the humidity and temperature of inspired gas and the function of the airway mucosa. Critical Care Medicine 1996; 24(11):1920-1929.

2) According to International Organization for Standardization (ISO) 8185:1997, the moisture output of an HH should be at least 33 mg/l (=75 % of the saturation humidity of 44 mg H2O/l at a body temperature of 37 °C)

3) Ryan SN, Rankin N, Meyer E, Williams R (2002) Energy balance in the intubated human airway is an indicator of optimal gas conditioning. Crit Care Med 30:355-361

ADVANCED ACCESSORIES – ACCESSORIES FOR ACTIVE HUMIDIFICATION – F&P MR850 AND F&P950

Accessories for Active Humidification – F&P MR850 and F&P950

Optimal respiratory gas humidification results in optimal mucociliary clearance in ventilated patients. This supports gas exchange and reduces the risk of cross-infection. The complications that are the result of unfavorable humidity conditions are reduced by optimal respiratory gas humidification. Fisher&Paykel's F&P 950 and MR850 products are available for neonatal and pediatric respiratory humidification.

RAIL ACCESSORIES

MEDICAL EXAMINATION LIGHT VARIOLUX® WITH LED TECHNOLOGY

The Dräger VarioLux is a cool, highly efficient examination light with variable light intensities which was specially designed for use in neonatal intensive care settings. Made for single-handed operation, it features adjustable color temperature settings as well as a dimmer function.

Operating mode:	Continuous operation
Weight:	1.5 kg (3.3 lbs)
Electrical values:	100 – 240 V, 50/60 Hz
Max. illumination intensity Ec at 0.5 m (19.7 in):	30,000 lx
Dimming levels:	30,000 lx, 24,000 lx, 18,000 lx, 12,000 lx, 7,000 lx
Light field diameter d10 at 0.5 m (19.7 in):	20 cm (7.9 in)
Light field diameter d50 at 0.5 m (19.7 in):	9 cm (3.5 in)
Color temperature adjustable:	Cool white (blue) 4,700 K, Neutral white (white) 4,100 K, Warm white (red) 3,500 K
Min. service life of bulb (LEDs):	> 35,000 h
Color reproduction index:	Ra = 96 (at 3,500 K) R9 = 89 (at 3,500 K)
Max. radiant power at 0.5 m (19.7 in):	105 W/m²

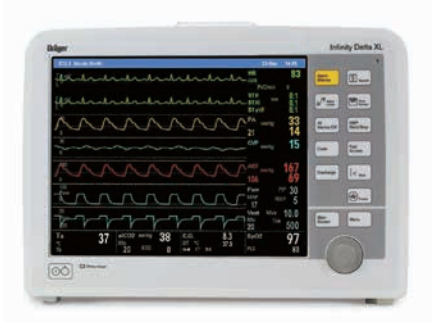
5. Monitoring Systems

MONITORING SYSTEMS

Infinity® Delta

Provides continuous monitoring and data collection both at the bedside and on transport – eliminating the need for separate transport monitors.

- Hospital-wide standardization
- Pick and Go® supports efficient patient transport
- Seamless wired-to-wireless networking



MT-1793-Delta

Infinity® Acute Care System (IACS)

In acute care environments, patient care has become increasingly complex. There is a growing need among clinicians for systems that are both easy to use and are aligned with hospital workflow. Dräger created the Infinity® Acute Care System monitoring solution to meet the needs of all care areas – both at the bedside and while on transport.

ACCESSORIES FOR MONITORING SYSTEMS

2. INFINITY® ACUTE CARE SYSTEM

2.1 ELECTROCARDIOGRAPHY (ECG)

NEONATAL ECG

ECG neonatal 3-lead adapter cable, 2 m (6.6 ft) MS25951	
ECG electrodes, single-patient use, neonate, 300 pcs.	5195024

2.2 PULSE OXIMETRY (SPO_2)

	MASIMO® LNCS CABLES	US	JP	
	For connection of LNCS sensors to Masimo® SET Mcable.			
A	SpO_2 intermediate cable Masimo® LNCS, 1.2 m (3.9 ft)	MP03027	MP03106	MP00800
A	SpO_2 intermediate cable Masimo® LNCS, 3 m (9.8 ft)	MP03025	MP03107	MP00797
A	SpO_2 intermediate cable Masimo® LNCS, 4.3 m (14.1 ft)	MP03026	MP03105	MP03194
	For connection of LNCS sensors to Masimo® rainbow SET Mcable.			
B	SpO_2 intermediate cable Masimo® Red LNCS, 1.2 m (3.9 ft)	MP03030	MP03109	MP02991
B	SpO_2 intermediate cable Masimo® Red LNCS, 3 m (9.8 ft)	MP03031	MP03110	MP02992
B	SpO_2 intermediate cable Masimo® Red LNCS, 4.3 m (14.1 ft)	MP03032	MP03111	MP03196

	MASIMO® LNCS REUSABLE SENSORS	US	JP	
	SpO_2 Masimo® sensor LNCS-YI Multisite, reusable, neonate/pediatric/adult	MP03023	MP03102	MP00789

	MASIMO® LNCS DISPOSABLE SENSORS	US	JP	
C	SpO_2 adhesive sensor Masimo® LNCS Neo, disposable, neonate, 20 pcs.	MP03014	MP03092	MP00792
D	SpO_2 adhesive sensor Masimo® LNCS NeoPt, disposable, premature baby, 20 pcs.	MP03015	MP03093	MP00794

	MASIMO® LNCS TRAUMA DISPOSABLE SENSORS	US	JP	
	Masimo® LNCS Trauma sensors are for use with Masimo® SET technology only.			
E	Masimo® LNCS Trauma sensor, infant/pedi, 20 pcs.	MP03018	MP03096	MP03193
F	Masimo® LNCS Trauma sensor, neonate, 20 pcs.	MP03017	MP03095	MP03192

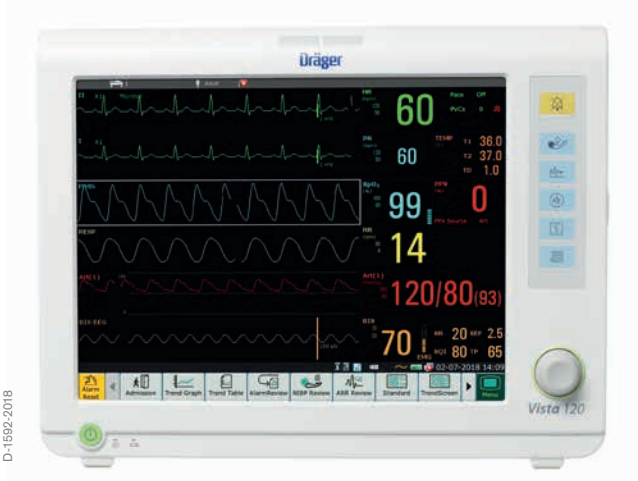
VISTA 120/VISTA 120 S/VISTA 120SC

Vista 120/Vista 120 S

Hospitals have a common challenge: provide the best care possible in an environment where patient populations are growing, financial constraints are increasing and caregivers are overburdened. Dräger offers patient monitors to meet the clinical needs in these environments: the Vista 120 and Vista 120 S.



D-1592-2018

Vista 120 SC

With increasing demands on clinicians, it's essential to have an easy-to-use vital signs monitor that can enhance your clinical processes and help you make informed decisions that can positively impact patient care. Providing both spot check and continuous bedside monitoring capabilities, it's the ideal monitor for your various clinical needs.

MONITORING SYSTEMS ▪ TCORE® TEMPERATURE MONITORING SYSTEM

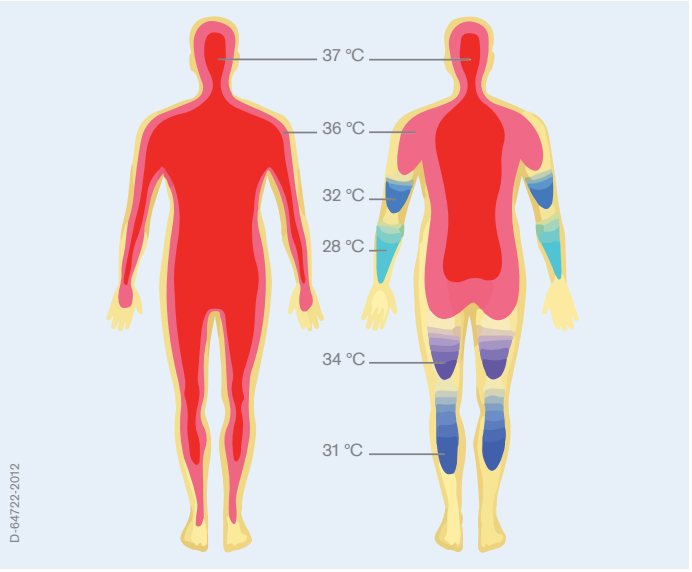
Tcore® Temperature Monitoring System

Tcore® – a new non-invasive technology

Tcore employs a unique dual-sensor heat flux technology, which, following a short ramp-up time, calculates core body temperature continuously and accurately.

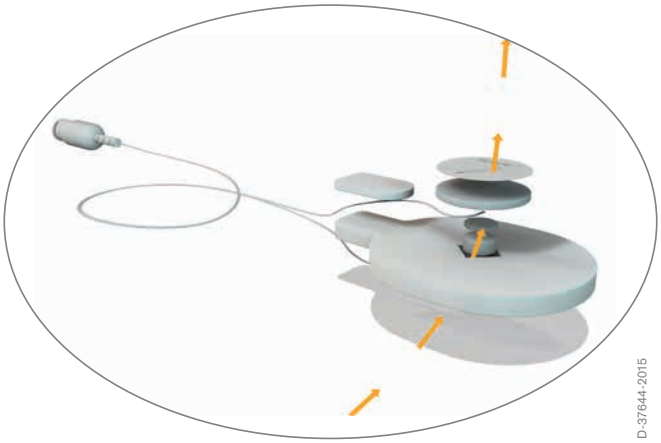
A simple, self-adhesive sensor placed on the patient's forehead is all that's required. This single-use sensor can be connected through a battery-powered adapter to Dräger monitors, eliminating the need for a dedicated display.

Mild and moderate hypothermia often occurs in patients undergoing medical procedures and can go unnoticed by caregivers.



Thermal monitoring is not a universal practice, and many of the methods currently in use deliver insufficient accuracy or are unreasonably invasive.

Studies have shown that patients who become even mildly hypothermic during medical procedures have longer recovery room times, longer ICU stays and require more analgesics than patients who maintain normal core temperatures. Maintaining normal core temperature helps reduce infections, complications and postoperative mortality rates which can lower the total cost of treatment. In fact, because of the positive impacts, many insurers provide additional compensation when active thermal management is used.



ACCESSORIES FOR TCORE® TEMPERATURE MONITORING SYSTEM

LITERATURE

Booklets:

High-Frequency Oscillatory Ventilation:
Theory and Practical Applications
(Jane Pillow)

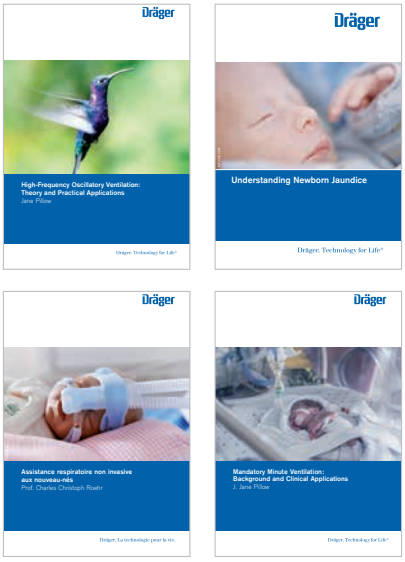
Understanding Newborn Jaundice

Assistance respiratoire non invasive aux nouveau-nés
(Prof. Charles Christoph Roehr)

Volume Guarantee – New Approaches in Volume Controlled Ventilation for Neonates
(Jag Ahluwalia, Colin Morley, Hans Georg Wahle)

▶ Please contact the Dräger sales.

Available in German and English.



Books for children's: Operation Dreamland + Mission Sleepwell

Operation Dreamland – Tim goes under anesthesia

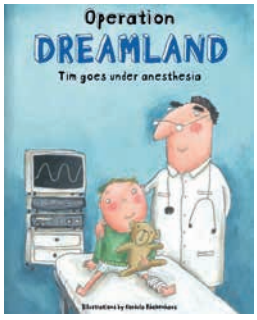
Inducing anesthesia in children is complicated. Five-year-old Tim has broken his leg – and now he has to undergo surgery. This book depicts what he experiences at the hospital (suitable for children aged 3 and up).

Mission Sleepwell – Max travels to the dream world of anesthesia

Ten-year-old Max fell off his skateboard and has to have surgery. This book tells the story of what he experiences at the hospital (suitable for children ages 6 and up).

▶ Please download the shown material on the Dräger website or contact Dräger sales.

Available in English, German, Italian, French and Spanish.



D-660-2016

D-661-2016

BabyFirst

Clinical knowledge & family focus. All in one place. The BabyFirst website is a clinical and informational knowledge base for neonatal professionals and parents of premature babies. BabyFirst was created to provide pertinent neonatal clinical information and satisfy a demand for educational tools needed by doctors, nurses, and hospitals. It is also a valuable tool for parents that are thrust into this very emotional and unfamiliar situation and are looking for information.
