About

- + Kerfab's Rehandling Buckets are optimised for applications requiring moderate breakout force
- + This bucket achieves the highest possible machine performance in both short cycle and load and carry applications.
- + Kerfab's standard line of Rehandling Buckets are available for machines up to 25T (custom sizes available)
- + A Rehandling Bucket is often used to handle processed sand, gravel, aggregate, limestone, and other materials between 1200kg/m³ and 2200kg/m³
- + Our range of buckets can come fitted with teeth, bolt on edges, or weld on edges - Kerfab can advise on what is best for your application
- + Multiple options can be fitted to a Rehandling bucket to improve its suitability for different applications, these include wear plates, internal liners, trash guards, and internal coatings. Kerfab can advise on what's best for

- + your applications
- + Kerfab's range of Buckets are available in a range of widths, capacities, and machine sizes. Below is a list of our most popular sizes.
