

thermostats

OJ electronic thermostats are specifically designed for electric underfloor heating systems. The thermostats are flush mounted and have a 2pole isolator with 16A output relay.

MTD3 - Standard Thermostat

Adjustable control with air/floor sensor. Allows you to maintain a constant temperature.ON/OFF switch.

MTD3

MWD5 - Touch Screen WiFi Digital Thermostat

Digital 7day / 4 event programmable thermostat, including WiFi remote control App.

TECHNICAL DATA - MTD3 & MWD5

Supply Voltage:	240Vac, 50/60hz
Output Relay:	16A SPST, 3600W max
Switching Differential:	0.4 degC
Built-in Switch:	2 pole 16A
Temperature Range:	0/+50 degC
Housing/protection:	IP21
Dimensions (HxWxD):	114mm x 84mm x 40mm
Mounted:	Vertical or Horizontal
Sensor Length:	3m
Warranty:	2 years

MWD5

Home Automation Thermostat - ETN4

Home Automation compatible with setback functions. Installed in a central switchboard.

TECHNICAL DATA - ETN4

Supply Voltage:	240Vac, 50/60hz
Output Relay:	16A SPST, 3600W max
Switching Differential:	0.4 degC
Built-in Switch:	2 pole 16A
Temperature Range:	0/+50 degC
Housing/protection:	IP21
Dimensions (HxWxD):	115mm x 84mm x 58mm
Sensor Length:	3m
Warranty:	2 years

ETN4

FLOOR SENSOR

All Comfort Heat thermostats include a floor sensor maintaining consistent floor temperature. Floor sensing thermostats are the safest and most energy efficient ensuring the floor is not overheated, but kept at the desired temperature.
