Battery Pack attached

Transfer the Milford Lift from your car

Folded flat ready to travel

Feet in open position

Battery Pack removed

Handle to adjust feet

Handle for transporting

The Milford SmartBase extends the usefulness of the Milford Person Lift as a vehicle transfer solution by providing a solid, stable and mobile platform for lifting someone from one sitting position, where ever you need it.

The Milford SmartBase is designed specifically for lifting someone from one upright position to another (i.e. from a wheelchair into a chair) and also offers other practical optional extra's such as a fixed lifting bracket for wall mounted solutions (ideal for bathrooms), or a lifting post for floor mounted solutions should you need it.
