## GREINER MEDBEST: MEDICAL DEVICES MADE IN GERMANY.

In response to the wishes of patients and those treating them, GREINER has taken up the challenge of developing innovative solutions that address clinical and economic needs in equal part. Made by GREINER means made in Germany. GREINER medbest has been supplying products for the medical field since the 1970s. A consistently high standard is applied in the development and production of GREINER couches. The same applies to our range of services. We achieve this by translating our flair for innovation into fully automated processes and handmade quality. High standards in design, materials, engineering and ergonomics combined with client-oriented flexibility make GREINER a partner to quality-conscious customers at the highest level.

## COMPACT THERAPY COUCH FOR INFUSION AND TRANSFUSION.

Chemotherapy in outpatient oncology departments is a major issue of our times. With much of the treatment being administered while patients are seated, there is a demand for couches that offer maximum comfort in this position too. With the available space often confined, couches are needed that can demonstrate quality even in very enclosed areas. Upholstery and armrests are critical to patient comfort. Depending on age and health status, patient access in the seated position also plays a key role in acceptance by patients and those caring for them. Generally speaking, the demands are high – and the new MULTILINE NEXT IT meets them in full thanks to the chair-like access it offers.

## MULTILINE NEXT IT.

This compact couch meets the specific needs of oncology day hospitals, infusion medicine and transfusion medicine. It combines space-saving design with the comfort and security of fully equipped models. Patients and those caring for them enjoy the full range of amenities and features, with the couch quickly conveying patients into the most suitable position for therapy. With a seat width of 60 cm and the perpendicular angle of the leg section, it can be used as a chair. The comfortable, extra soft upholstery, patient-friendly armrests that support therapy and wide range of fittings make the MULTILINE NEXT IT a next-generation couch.

### GREINER for oncology:

- ◆ Totally new concept in terms of design, technology and features; smooth-running mobility with central locking if required
- ◆ Version with three motors for the stepless adjustment of backrest, seat and leg section into required positions, including the emergency Trendelenburg position
- ◆ Comfortable cushioning in a wide range of colours, high levels of seated and reclining comfort, maximum hygiene with a minimum of seams
- ◆ Unique design with 90° angle of leg section – perfect for chair-like access and exit, minimal space requirement
- ◆ Flexible design variants and configurations adapt to every practical purpose
- ◆ Independently certified product safety and superb reliability

## MULTILINE NEXT IT. ONCOLOGY THERAPY COUCH.

The new therapy couch developed by GREINER packs the performance of technically sophisticated couches into a compact form for restricted spaces. Designed for patients who may be very weak or afflicted by extreme symptoms, the couch helps them through the difficult times. It features ease of access, smooth rollers, clear functions, stepless motorised movement to the required position, comfortable armrests and cosy upholstery in soothing colours. The emphasis is on patient comfort, ergonomics and efficiency to ensure the best treatment conditions for patients over hours of chemotherapy.

GREINER hand control unit with intelligent operation: simple, internationally understandable symbols; keys for basic settings for seated, relax, flat bed and Trendelenburg positions are easily accessed in an emergency. Safety is assured thanks to a magnetic key lock.

### Comfort, functionality and ergonomics.

With stepless motorised adjustment and intelligent and intuitive operation via the selection and control keys of the GREINER control element, the MULTILINE NEXT IT for infusion and transfusion therapy promises high levels of seated and reclining comfort in all situations. The three-motor couch quickly and gently moves to any required or preferred position – from seated, relax and bed positions to the emergency Trendelenburg position – at the touch of a button. Access and exit is considerably eased by the vertical leg section and access height of 54 cm.

The GREINER design concept makes it easy for carers and patients alike to use the powerful motors for the backrest, seat and leg sections efficiently. The couch is mobile, stable and secure.

## MULTILINE NEXT IT. NEW LEVEL OF COMFORT FOR INFUSION AND TRANSFUSION.

GREINER produces treatment couches tailored to your precise needs. You choose the covers and cushions individually. Premium covering materials and upholstery offer extra-soft, wear-resistant surfaces; a dynamically flexible suspension system in the seat section supports freedom of movement for the spine, pelvis and hips, thus relieving pressure to the benefit of patients. Furthermore, the armrests are also setting standards for patient-friendly positioning. The overchair tables BT and BT plus ensure that the focus is firmly on patient comfort.

Low-level access from the front and side, fold-up armrests

Unique armrest technology with patient-friendly positioning

Comfortable pillows

LED reading light

High comfort with BT overchair table

Overchair tables BT and BT plus

Choose upholstery from colour chart

Handle with paper roll holder

Flawless technology even in very enclosed spaces (measurements in mm)

**Flexibility**  
Infusion pole holder can be pivoted left and right with just one hand

**Hygiene**  
Design compliant with stringent regulations, ease of access, clean surface finish, tested surfaces, minimum of seams

**Colours and accessories**  
Comprehensive range with many configurations

- Handle with paper roll holder
- Infusion pole holder, pivoted, one-handed operation
- Infusion pole
- Integral foam armrests
- Standard rails
- Premium cushion cover materials
- Seat with pressure-relieving springs
- Foot switch/emergency switch
- Overchair tables BT and BT plus

### Dimensions and technical data

• Chair upright (floor space)	110 x 78 cm
• Recline position (floor space)	196 x 78 cm
• Total width	78 cm
• Surface in reclined position (L x W)	196 x 60 cm
• Thickness of padding	7.5 cm
• Armrest (L x W)	56 x 12 cm
• Access height	54 cm
• Castor diameter	10 cm
• Backrest	- 5° to 78°
• Seat section	0° to 22°
• Leg section	0° to 90°
• Maximum patient weight	220 kg
• Voltage	230 V/50-60 Hz, 110 V/50-60 Hz
• Weight of couches	78 kg

## we design quality.

Agreeably health-promoting seating has motivated us since 1922. For decades we have been making high-quality, technically sophisticated couches within the medbest range. Our innovative devices for examination, dialysis, oncology, blood sampling, care and transport are all made in Germany. Our quality commitment is verified by an independently audited quality assurance system: GREINER is certified under DIN EN ISO 9001 and 13485.
