

RAPID PREMIUM 5L Autoclaves

TGA APPROVED | 2 YEAR WARRANTY

No more waiting around for loads to finish when you use a ProMedCo Rapid Autoclave.

The Rapid has an aluminium alloy rectangular chamber and offers premium drying when compared to a stainless steel cylindrical chamber. The smaller chamber is key to reduced cycle time.

The perfect autoclave for busy practices that need instruments turned around quickly.

ProMedCo Rapid Series autoclaves are suitable for wrapped or unwrapped instruments, hollow A and hollow B types of instruments, implant instruments. Suited to Medical, Dental & Ophthalmology Clinics or anywhere autoclaves are expected to meet high sterilization standards and fast cycle time.

PROMEDCO RAPID SERIES: PREMIUM MODEL

ProMedCo Rapid is faster than you ever thought possible. With a variety of sterilisation programs including the flash cycle and include “Pre-vacuum air removal” and “Vacuum Drying”, enabling quick turnover of instruments, especially for handpieces, scaler handles, implant handpieces and implant tools.

Pre-Vacuum

Three times pre-vacuuming quickly removes the cold air inside hollow instruments such as handpieces and scalers, which results in full steam penetration into instruments. This not only ensures the sterilisation quality but also prevents harm to the instruments due to uneven heat.

Vacuum Drying

Vacuum drying avoids high temperature and toxic environments that harm instruments. Compared to conventional hot air drying the Rapid vacuum ensures perfect drying conditions for wrapped instruments.

FEATURES AT A GLANCE

Rapid cycle available

Great for quick turn over of instruments

Large touch screen

Ulvac Japanese Pump

Inbuilt printer with SD card holder

Aluminium alloy door handle

Compact size
550mm x 365mm
x 385mm

Includes 2 trays

Aluminium alloy rectangular chamber

Holds record of last 20 cycles
