

Contour Barituff-X

A 500kg SWL extra-wide electric trauma trolley designed for Bariatric patients.

Key Benefits

Purpose built: Increased componentry strength in the core frame design operates with higher capacity columns to safely lift 500kg without overload.

Effortless control: Sit and position your patient comfortably and then raise them to the desired work height with the touch of a button.

Custom quality: Manufactured in Australia with speed, quality, and care, plus customisation capability.

Longest warranty: Peace of mind with a lifetime of local support, easy maintenance, and fast guaranteed parts.

Application

Ideal for ED / Imaging & Bariatric Care

Why Buy?

Having equipment that is robust enough, that you can completely rely on, is the greatest challenge when caring for Bariatric patients. The Contour Barituff-X has increased componentry strength in the core frame design and operates with higher capacity columns to safely lift 500kg without overload.

The stronger and wider top comfortably caters for large patients, with a choice of mattress styles available to suit the type of departmental use. Trolley stability is assured through an increased base size. The unique [Contour Orbit-Drive powered drive system](#) and weigh scales genuinely reduce manual handling risks to the carer. This trolley has been built for Bariatric patients.

Contour Barituff-X

Ultra-low height

Very safe and easy for patients to get on and off. The 600mm low platform height of this table takes away the requirement to use step stools or unnecessary heavy lifting. Sit and position your patient comfortably and then raise them to the desired work height with the touch of a button.

Excellent high height

Preserve your back and raise a patient up to your best working height. Lifting the platform height up to 980mm (plus an extra 100mm for the mattress pad thickness), helps you to examine and treat your patient without having to stoop over, ensuring easy access and less stress. The backrest travels from 0 to 85 degrees with emergency CPR quick release.

Head and foot tilt

A generous 15 degrees top tilt both directions. Position a patient how you need them or quickly lower their head down (and feet up) in an emergency.

Cassette holder options

Holders can be produced with single or double sided handles and any depth or shaped rebates to suit all of the unique cassette sizes in use today
