Electric Scissor Lift table

- 2000kg Capacity;
- Min-max table height: 190 – 1040mm
- Safe, reliable, sustainable and low maintenance

CE

2T Electric Scissor Lift table

These high-quality scissor lift tables are driven by an electric motor mounted under the table, which is controlled by a pendant hand controller on a curly cable.

The table utilizes a safety bar around the perimeter to sense any foreign objects in which case it will stop the movement instantly. These tables are normally operated from the factory floor but can be installed in a pit (require eyebolt lifting lugs).

- The tried and trusted lift table with sturdy construction.
- Multiple uses such as lifting and lowering materials, level compensation when fitting machines, installations in the conveyor system, etc.
- Compact hydraulic design with all safety components complying with EN1570.
- High-pressure cylinder with dual safety function.
- Hard chrome plated piston rods.
- Lift and lower by easily push buttons to reach the ergonomically correct working height.
- With the emergency switch off and a 3m long control cable.

Warranty: 1 Year refer to the JIALIFT warranty terms and conditions
