

Re-inventing the world of beverage dispensers

ELECTRONIC

I-PRO2

I-PRO

The most advanced slush machine in the world

Autofill Premix

Autofill Postmix

An absolute **innovation** by SPM Drink Systems. These units are unique in design and deliver **superior** performance.

The exclusive **insulated** bowls powered by **i-Tank™** technology minimises the influence of external temperature, increases the cooling power and enhances product consistency. It reduces condensation on the outer bowl enhancing the product attractiveness.

The **i-Tank™** coupled with the electronic control system on the I-Pro Electronic range assures **optimum** performance and energy **efficiency**.

The I-Pro range is ideal for convenience stores, bars, fast-food chains, kiosks, restaurants, hotels etc.

All models are available with **autofill** systems (premix and postmix).

- Energy Saving*
- Effective Cooling
- Condensation Reduction
- Also available with an illuminated front panel (right)

Tanks work independently. Lockable lid. Always read the User's Manual.

Features

MECHANICAL

The I-Pro Mechanical range has innovative and distinct features. The introduction of the i-Tank™ technology and LED cold lighting distinguish it from the traditional slush machine.

The I-Pro Electronic range is a genuine revolution in the industry. Design and technology combine into a unique slush dispensing system allowing it to achieve energy saving as high as 60%.*

Autofill capability allows the bowls to remain full at all times making the product in the unit look attractive and invites impulse sales. Acoustic and visual indicators when product is empty or water supply shut off.

*Comparative test done with other machines of the same category branded SPM Drink Systems

Selling Point

I-TANK™ Technology

Energy Saving

Higher cooling efficiency

Cold light illumination with LED

Capacitive touch screen control board
