

ELECTRIC HI-LO WALKING RAILS

Our new design Electric Parallel bars enables the practitioner to quickly and simply adjust the height of the rails (and the width - available on all sizes) to accommodate the patient's needs.

Electric Rails in Clinic

- The height adjustment is powered by a rechargeable battery
- We use Dewert Actuators, the world's leader in actuators & controllers
- The width adjustment option is over 37cm
- The rails are bolted into the floor, thereby eliminating any obstacles
- The rails are available in 6 lengths, from 3 metres to 8 metres
- We can also provide custom length to suit your requirements
- The weight rating is 220kg Wheelchair patients can confidently use the bars to lift themselves into the standing position
