

Are you Emergency Spill Response ready?

Does your site have the right documentation to ensure your emergency spill response equipment is being maintained? Are you meeting your obligations for:

- Work Health Safety (WHS) Regulations
- Environment Protection Legislation?
- your Environmental Management Plan (EMP) (Australian Standards)?

We can help!

Our spill kit service program was developed to make it easier for you to be compliant and prepared for an emergency incidence. We can also customise a site program to meet your specific needs and prepare you for such emergencies.

How can you meet best practice and save costs?	Your internal process	Absorb Service
