Steel Housing**

**Economical
Price**

Introducing our Tenso Automatic Strapping Machine – Stainless Steel, an automatic strapping machine featuring stainless steel, specifically designed for moist working environments like meat, seafood, poultry, and agricultural processing plants. This fully automatic strapping machine seamlessly combines user-friendly operation and easy maintenance, offering exceptional value at an economical price point. With a polypropylene strap width ranging from 8mm to 12mm, adjustable tension from 7 to 45kg, and a high operational speed of up to 29 straps per minute, it stands as the most cost-effective solution for general applications requiring wide straps.

Features

- Reliable and robust strapping head
- Electronic tension control
- Up to 29 straps per minute
- Wide strap compatibility (8-12mm)
- Auto strap feeding
- Auto strap ejector
- Short feed sensor
- Auto strap refeed
- Strap end ejector
- Multiple methods of cycle initiation

Industry Applications

- Meat
- Seafood
- Poultry
- Agricultural processing plants

Specifications

Capacity:	Up to 29 cycles/minute
Strap Type:	PP Strapping
Strap Width:	8mm, 9mm, or 12mm
Tension Range:	7 - 45 kg *up to 70 kg on request
Weight:	220kg
Electrical Requirements:	110V, 220V, 230V, 240V 50/60Hz 1PH 220V, 380V, 400V, 415V 50/60Hz 3PH
