

# A&G Smart Logger

Arrowsmith & Grant  
Refrigeration

A&G Smart loggers can be purchased individually for any temperature monitoring required on existing medical units.

Manage multiple Smart Loggers in locations around the world and view them using your web browser or the A&G Smart Cloud App. The Smart Cloud offers unlimited & secure data storage, advanced alarm notifications to multiple users, powerful analysis tools and reporting from all your devices.

Plus, the first 5 years of A&G Smart Cloud access is FREE.

## A&G SMART CLOUD SERVICE

- ✓ Remote temperature logging.
- ✓ The temperature range available will cover all your temperature critical equipment, from ultra-low freezing at  $-100^{\circ}\text{C}$  to high temperature appliances at  $+125^{\circ}\text{C}$ .
- ✓ Cloud storage of temperature data. Stores data internally if the device loses Wi-Fi connection and automatically uploads it to the Cloud once reconnected.
- ✓ Unlimited Cloud storage.
- ✓ Downloadable and Printable Reports.
- ✓ Meets the requirements as per AS3684.2 with 1min temperature logging.
- ✓ Multiple devices can be managed under the 1 account.
- ✓ Multiple users can review the Cloud logging via web browser or mobile app.
- ✓ The A&G Smart Logger has an inbuilt battery that will continue logging should power be lost. (Power supply available)
- ✓ Alarm functions include a built-in buzzer and LED light.
