

ABSORB PLUS – Environmental Awareness and Spill Kit Induction with Practical

Overview

The ABSORB Plus Training provides staff with a basic level of training in environmental awareness and spill kit induction with spill simulations to develop practical hands on experience. The level and depth of this training is aimed at the general employee. This course will provide the necessary environmental training to address your due diligence requirements.

The Training Objective

The objective of this training is to reinforce policy on such as environmental legislation, hazard identification, PPE requirements, spill response, report and reorder procedures, as well as prevention guidelines.

The Training

This Training Covers:

- Environmental Legislation and Individual Environmental Duty of Care
- Absorbent Selection Criteria
- Eight Steps - Handling a Spill. These include the use of Personal Protection Equipment and spent product disposal.
- Simulated spills based on a limited number of scenarios; where attendees are required to demonstrate their knowledge of spill response procedures.
- Attendees will be split into smaller groups and will participate in the practical component of the course.

Certification

This is a non-accredited program. However, a “record of training” and certificates will be provided on completion of the course. Individual certificates of attendance are issued following the training.

Duration: 2 hours

Who should attend: The level and depth of this training is aimed at the general employee.

Location: Your Site

Course Size: Maximum 20 attendees

Training Resources: Training Room, Whiteboard/ Screen Area.
