

Summit 1350

Automatic Wheel Balancer With LCD Display Monitor

The Summit 1350 Wheel Balancer, with an in-built LCD display monitor, is the perfect machine for the smaller workshop. As a fully computerised system, with automatic measuring arms, it allows the user to automatically input all rim data.

Summit 1350

Machine Features

- Automatic measuring & input of rim diameter, width & offset using automatic measuring arms
- Bright & easy to read LCD display monitor with 3D graphics
- Control panel with rotary selector for different balancing modes
- Automatic start of the machine by closing the wheel guard
- Automatic stop into the correct position for weight application using the automatic brake after spin
- Multiple alloy programs
- Split weight program for concealed attachment of weights
- Durable weight tray with ample storage for wheel weights

LCD Display Monitor

This balancer includes a large, bright and easy to read LCD display monitor.

Electronic Measuring

The 1350 is a fully automatic machine, and includes electronic measuring arms to detect the rim data. This also allows the operator to choose where the wheel weights will be attached.

Brake Pedal

Accuracy Is Important, The 1350 includes a brake pedal which locks the wheel during weight placement.

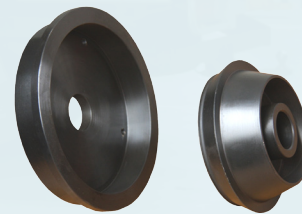

Standard Accessories:

- Four balancing cones (Inc 4WD)
- Rim width gauge
- Wheel weight pliers
- Quick release mechanism
