MONITOR 1575

The Monitor 1575 is an extremely compact Spider Lift for the most difficult applications. The track system expands out for extra stability and stands taller for extra ground clearance.

When retracted, it reduces to only 790 mm wide and lowers the machine to 1920 mm height for very narrow access.

The basket quickly and simply detaches with only one pin for accessing very tight locations. The basket can then easily be rolled along by one person on its own castor wheels.

Uniquely, the dog-leg shaped stabilizers provide a huge amount of travel for setting up on very uneven terrain. And with dual power sources, the Monitor 1575 is just as at home indoors or outdoors!
