

The laser treatment helps skin cells recover and generates proteins like collagen, elastin, etc. by micro stimulation on the skin. However, if the skin retreats with a laser before the protein is in a fully regenerated condition, the skin barrier will collapse so the skin is easily changed to sensitive skin. With the periodic este7 care, the moisture fully penetrates deep into the dermis and accelerates skin regeneration.

Product Name	este7
Power Consumption	100VA
Rated Voltage	AC 220V, 60Hz
Main Unit	380(W) X 340(L) X 310(H) mm / 5kg
Cart	400(W) X 380(L) X 780(H) mm / 12kg
Manufacturer	SNJ Co., Ltd

# este7

High-Performance  
Skincare System

*Skin  
Balance*

**este7**

The genuine skin balance which is  
completed with **7 techniques**  
of combination

## Main Benefits

### Strong Output Power 1MHz Ultrasound

**Exceptional Strong Output Power 1MHz Ultrasound** targets the hypodermis which is located at a 30-45mm depth and increases the skin's elasticity.

Do you have concerns because of sagging skin immediately after HIFU or other lifting treatments?  
It is time to start tightening the hypodermis layer with este7

If you are reluctant to be treated with another brand's ionzyme clips because of a burning problem whenever it directly touches your skin.

- You can be treated without concern with the este7 complete insulated ionzyme clips.
- The clips are our own design which can be conveniently used to increase the patient's safety.
- Please calm the skin with -10° cryo therapy after the stimulating treatment.
- You can treat the entire face with the big-sized cryo head more quickly and effectively.
- When you apply calming gel and activate the electroporation simultaneously, you can maximize the skin's sedation and revitalization effect.

No matter how good the laser is, can you do it every week?

Is it just the feeling of pigmentation rebound and the skin becoming drier after laser treatment?

1

**Fully fill your skin with moisture with sonophoresis!**

The lipid bilayer is split with **1 million times per second ultrasound vibration** and highly concentrated moisture essence is completely filled in through this split gap. Therefore, it **moisturizes the skin** and **revitalizes the damaged dermis** through the care of several devices.

2

**Is it possible to have light and unblemished skin by taking Vitamin C?**

If you do laser toning expecting light and unblemished skin, add **este7 Vitamin C care!**

**Lontophoresis "-" pole directly pushes the ionized Vitamin C deep into the dermis.**

## Intensive Vitamin C Care | - Ion

**VITA-C 30**

"Brightening, high-functionality, antioxidant, anti-inflammatory"  
This is a solution that can quickly show the antioxidant effect with 30% ascorbic acid and a highly soluble activator prescription.

+
