

MT15DM Bedside Terminal

Clinical IT and patient infotainment terminal for bedside communication, education, and teleconsultation.

Product Overview

The MT15DM is a bedside clinical IT terminal designed to support patient engagement, teleconsultation, and hospital information services. It complements patient monitoring systems by providing a digital interface for communication, education, and non-clinical bedside interaction.

IEC60601-1 | EN60601-1 | ISO22196

Key Features

- > 15.6-inch /21.5inch high-definition display
- > Touchscreen user interface
- > Designed for bedside mounting and hospital environments
- > Supports teleconsultation and video communication
- > Patient infotainment and education platform
- > Integration with hospital IT systems (configuration dependent)
- > Antibacterial housing design
- > IP-rated front panel suitable for clinical cleaning protocols

Primary Functions

- > Video communication and teleconsultation
- > Patient education and multimedia content
- > Hospital information and service access
- > Electronic medical record access (read-only, configuration dependent)
- > Nurse call and communication support (integration dependent)

Model Snapshot

Device Features:

- High-resolution LCD display with wide viewing angle
- Responsive capacitive touchscreen
- Built-in speakers and microphone
- USB and network connectivity
- NFC reader support (configuration dependent)
- Integrated reading light
- Supports wall-mounted and bedside arm installations

Clinical & Hospital Applications:

- Inpatient wards
- ICU and step-down units
- Long-term care facilities
- Rehabilitation centers
- Telemedicine and remote consultation environments

System Integration:

- Integration with hospital information systems (HIS)
- Support for telehealth platforms
- Compatibility with hospital network infrastructure
- Peripheral device support (configuration dependent)

Compliance & Notes:

The MT15DM is a clinical IT and infotainment terminal and is not a patient monitoring or diagnostic device. Functions and integrations depend on system configuration. Specifications are subject to change without notice.
